

SYDNEY BIOMEDICAL ACCELERATOR

The Sydney Biomedical Accelerator (SBA) is a co-funded partnership project between the University of Sydney, Sydney Local Health District and the NSW Government comprising a state-of-the-art biomedical research complex.

It will be located at the University's Camperdown Campus and the District's Royal Prince Alfred (RPA) Hospital campus. The SBA will be located on the corner of Western Avenue and Cadigal Lane in Camperdown.

The SBA will be a collaborative world-class health, education and biomedical research and innovation complex that will integrate world-leading fundamental biomedical science with clinical research and innovation. The proposed development includes public domain upgrades and landscaping surrounding the new building. Construction will commence in Q2 2025 and is anticipated to be completed in 2028, weather and industry conditions permitting.
