3 STRATEGIC ITEMS OF BUSINESS

3.1 Thematic Review 2021 - The Quality of Assessment at the University of Sydney

Resolution AB 2021/6-03
The Academic Board resolved to approve the Thematic Review 2021 into the Quality of Assessment at the University of Sydney and the following recommendations arising from the review:
1. Develop procedures and structures to enable staff to share best practice in constructing valid and reliable authentic assessment tasks, and increasing their use, across all disciplines within the University.

2. Implement collegial peer review and peer collaboration capacities at faculty and discipline level. Incorporate assessment and feedback into peer reviews of teaching, to ensure assessment advances student learning and is valid, equitable and reliable.

3. Include professional learning commitments in the Governance, Leadership and Engagement (GLE) component of teaching staff workload. Strongly encourage all teaching staff to complete the MPLF module 5.1 ‘Assessment and feedback for learning’ and to learn from exemplars from across the institution.

4. Cultivate understandings of feedback as an essential part of assessment design. Encourage the use of assessment designs that build in a feedback component prior to marked assessment.

5. Use the tools available to manage staff and student workload management around assessments. Avoid over-assessment across majors and courses, including total unit, component and course volume of assessment.

6. Reduce the number of assessments in units and ensure that the maximum weighting for any assessment is 60%, with reasonable exceptions such as research projects.

7. Introduce students to the wider concept of feedback in the early part of their degree. Include this broader understanding of feedback in staff developmental activities.

8. Include a teaching portfolio that includes demonstration of assessment and feedback literacy, and the nexus between the two, in all touchpoints of academic career progress such as recruitment, APD and the case for promotion.

9. Continue with the work to assess the graduate qualities to provide feedback to relevant program directors on the success of embedding the graduate qualities across undergraduate degrees.

10. Develop a business plan to convert the assessment plans into a more sustainable, digital format housed in Sydney Curriculum.

11. Develop a portfolio of evidence for teaching staff to assist them to demonstrate the alignment between assessment and outcomes. Ensure that professional learning opportunities are available for staff to develop the skills to create alignment and provide evidence of alignment.

12. Continue to develop a Universal Design for Learning approaches to teaching and assessment.

13. Continue in the Quality Verification System (QVS) at an institutional level, and explore the possibility of expanding our involvement in that process.

14. Encourage participation in discipline-based peer reviews of assessment networks outside of the QVS, as well as professional accreditation-based reviews, and have those reported to AQC.

15. Produce biannual quality summaries at an institutional level that include: fail rates, assessment weighting, numbers, types across faculties, and a University-wide report to DVCE on trends in rates of retention, progression and completion.

3.2 Reflections on Education at the University of Sydney

Resolution AB 2021/6-04
The Academic Board resolved to note the reflections on education at the University of Sydney.
