

IMPROVING ASSESSMENT OF COGNITION, BEHAVIOUR AND SOCIAL FUNCTIONING

WHAT IS THIS STUDY ABOUT?

We are investigating thinking, behaviour, and social functioning in adults. We are aiming to better understand the types of symptoms people experience and why they occur.

WHO DO WE NEED?

- Adults over 18 years of age with concerns in their cognition, behaviour, or social functioning
- Healthy volunteers with no previously diagnosed neurological disorders

FOR REFERRALS:

PHONE: (02) 9036 4784

EMAIL: neuropsychology.clinic@sydney.edu.au

WEBSITE: www.sydney.edu.au/brain-mind/our-clinics/neuropsychology-clinic.html

LOCATION:

Level 2, Building F
Brain and Mind Centre
94 Mallett Street
Camperdown NSW 2050

WHAT WILL PARTICIPATION INVOLVE?

Participants may:

- Be interviewed about their medical/family history, education, and occupational background
- Complete a 1–3 hour cognitive assessment comprising tests of memory, language, and thinking skills
- Undergo physiological measurements of their heart rate, breathing, blood pressure, or eye movements

YOU WILL RECEIVE:

- A neuropsychological assessment at no cost
- A personalised feedback session and/or report summarising the visit and findings
- Recommendations and/or referrals for any relevant support services (if applicable)

WHAT IS THE REFERRAL PROCESS?

Individuals may:

- Be referred directly by a general practitioner/allied health professional, or
- Refer themselves or their family member (with supporting referral letter from their general practitioner),

We will accept general referral letters:

- Stating participant contact details
- With a brief outline of inclusion & exclusion criteria
