

# UK MaaS Update

**John D Nelson**

Chair in Transport Studies, Centre for Transport Research  
School of Engineering, University of Aberdeen  
and Honorary Professor, ITLS Sydney

E-mail: [j.d.nelson@abdn.ac.uk](mailto:j.d.nelson@abdn.ac.uk)

ITLS MaaS Seminar, 18<sup>th</sup> July 2018

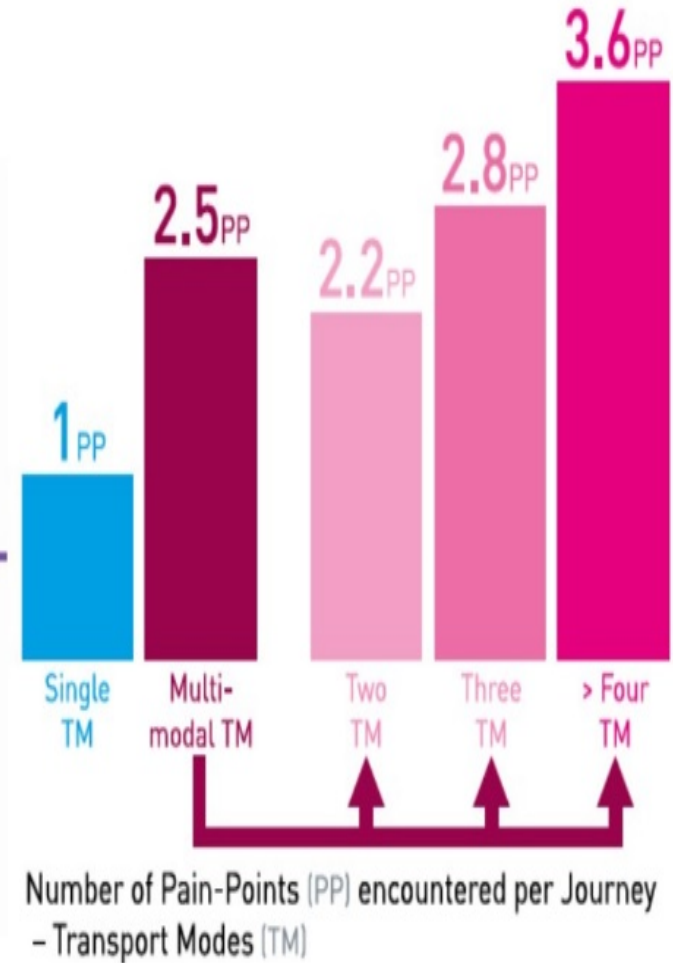

# Overview

- ❖ Context
- ❖ Scotland update
  - MaaS Scotland
  - NaviGoGo
  - Rural MaaS: Cairngorm Connected
- ❖ England update
  - Whim – West Midlands
  - MaaS London
  - Travel Spirit
- ❖ Other related research
- ❖ Conclusions

# Travellers want better ....

of UK Travellers  
will experience  
pain point(s) during  
their journey.

## Travellers want better ....

**72%** of UK Travellers  
own smart phones

(59% consider these devices  
essential to their travel experience)

SEVENTY TWO PERCENT

# MaaS Scotland

- Established in March 2017 to be a formal network for the MaaS ecosystem, facilitating initiatives that will deliver the benefits of this transformational opportunity to Scotland.
  - Scotland is home to some 240 companies, public agencies, funders and universities all with the capability to contribute to the MaaS value chain.
- MaaS Scotland supports the growth of a strong cluster of companies who can supply products and services along the MaaS value chain in partnership with the public sector.
  - 69 members @ June 2018
- Hailed as the blueprint for similar clusters around the world.
- <https://maas-scotland.com/>

**Mobility as a Service:**  
Positioning Scotland for  
an Emerging Global Market

# MaaS Scotland – White Paper (Feb 18)

## **1. Formation of a joint Working Group, to include Transport Scotland and MaaS Scotland, that will develop a roadmap for the delivery of a National MaaS Framework**

- Facilitate upscale and roll out of successful MaaS models across Scotland
- Create an attractive environment for inward investment
- Encourage innovation in a significant new export market
- Position Scotland as the global partner for the development of MaaS models

## **2. An initial Scottish Government investment of £1-2m in the form of 'MaaS Delivery Fund' to support ongoing MaaS projects over the next two years**

- Leverage national and international private sector investment
- Generate an evidence base to support future policy and planning decisions
- Identify innovative ideas and exportable solutions
- Strengthen Scotland's reputation as a world leader in future mobility

## **3. Scottish Government investment to support MaaS Scotland activities until 2021**

- Support and grow Scotland's MaaS community
- Facilitate current and new MaaS projects
- Promote Scotland's products and expertise on the global stage
- Provide thought leadership at national and international level

**A partnership between  
Technology Scotland  
and ScotlandIS**

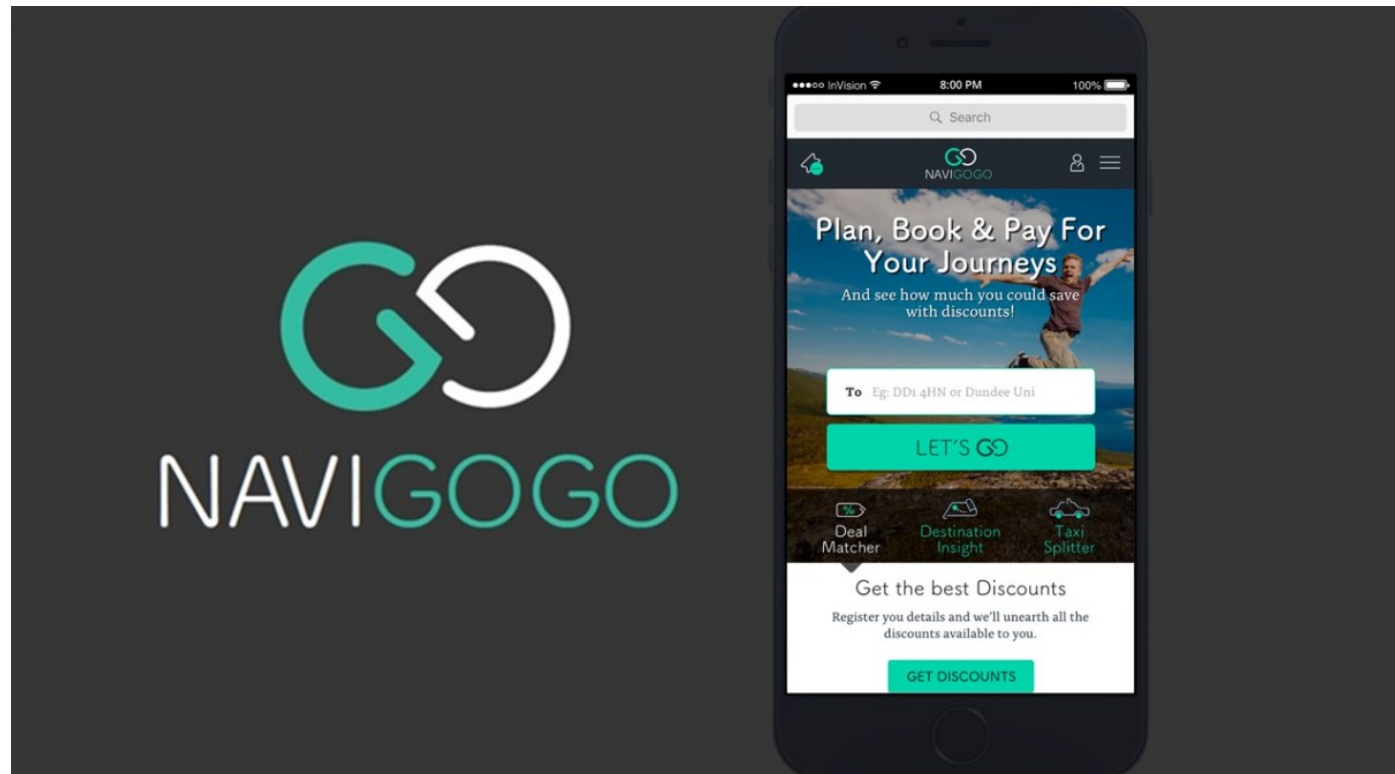

- NaviGoGo is Scotland's first MaaS web application; co-designed by young people, for young people.
- 6-month Beta trial with 100 young people in Dundee and North East Fife (October 2017 - March 2018).
- Key features:
  - A personalised journey planner with fare calculator responsive to a user's profile and entitlements (trains, taxis, buses and shared bikes)
  - A journey payment platform
  - A taxi splitter tool for calculating the cost of a taxi journey with friends
  - A 'Discover a Destination' database containing local transport information
  - Incentive points for positive/sustainable choices through Young Scot rewards

# NaviGoGo

<https://navigogo.co.uk/>

- During the 6-month trial:
  - 2000+ journeys planned
  - 480+ journeys booked and paid for – 38% travelled on bus after finding out price
  - £3500+ NaviGoGo spend
- Needs a scalable business case... and further investment

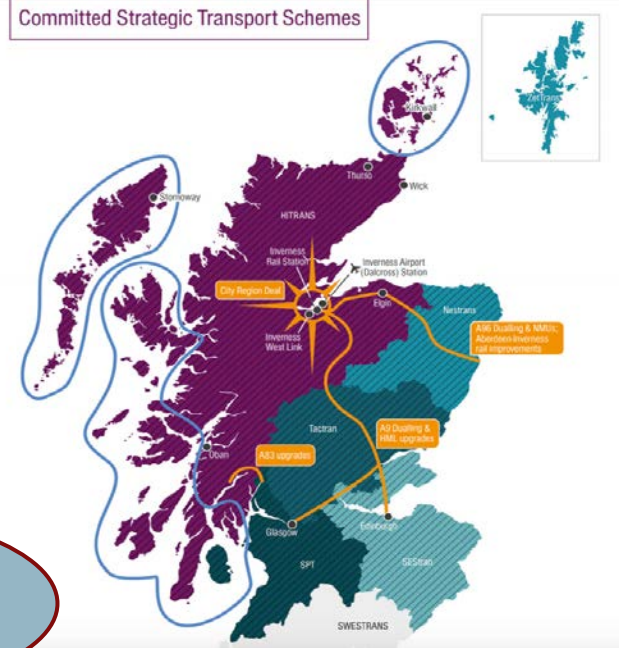

# Rural MaaS

Current pain points

Employment - seasonal

Current infrastructure

'Fuel Poverty'

Aviemore

Balmoral Castle, Balmoral, Ballater AB3

Depart at 9:30 AM Sat, May 5

Send directions to your phone

9:53 AM (Saturday) – 5:59 PM 8 h 6 min

9:55 AM from Station 15 min

DETAILS

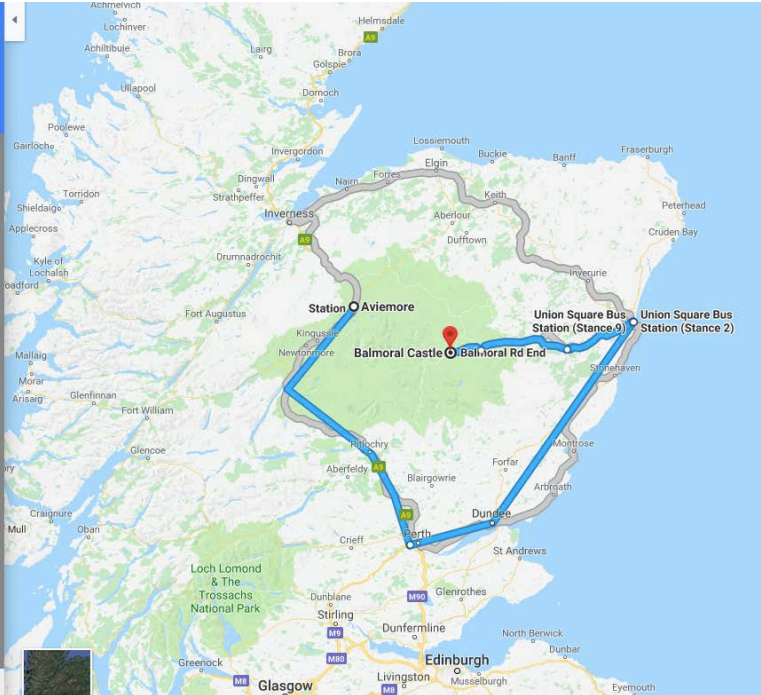

1:33 PM (Saturday) – 8:56 PM 7 h 23 min

ScotRail

5:44 PM (Saturday) – 9:57 AM (Sunday) 16 h 13 min

ScotRail

6:14 PM (Saturday) – 11:57 AM (Sunday) 17 h 43 min

Cairngorm Connected

# Rural MaaS – ETP studentship

- This project is examining the requirements for delivering MaaS as part of a low carbon transport strategy in a rural setting. The objectives may be summarised as:
  - 1) to establish the user requirements for rural MaaS, in the context of a suitable case study to be identified jointly with industry partner HITRANS;
  - 2) to explore the potential for MaaS to address existing mobility gaps;
  - 3) to work with relevant stakeholder groups (including transport providers and authorities) to identify a variety of MaaS use cases for both passenger and freight;
  - 4) to evaluate the potential use of existing software platforms (such as the Highland Council's VISUM model) in a rural shared mobility context to evaluate Rural MaaS scenarios;
  - 5) to develop and evaluate, via simulation, likely emissions reduction under a variety of MaaS scenarios (including EV uptake); and
  - 6) to explore the business case for "Rural MaaS".

# Whim App (West Midlands - trial)

- Developed by MaaS Global
- Launched April 2018
- Transport modes, tickets, bookings and travel plans in one easy-to-use app.
  - Includes Gett taxis, National Express buses and Midland Metro trams, city bikes (nextbike) and rental cars (Enterprise).
- Pay one trip at a time (Pay as you go) or choose a monthly package (Whim Everyday / Whim Unlimited).
- Evaluation to be completed by Transport Systems Catapult (TSC).

- Bus only plan (Whim Everyday Bus) – under development

<http://whimapp.com/uk/>

# MaaS in London

- MaaS-London platform proposed as part of DfT-funded 2015 feasibility study by UCL Energy Institute
- Various projects associated with the MaaS Lab @ UCL
- London datastore
  - <https://data.london.gov.uk/>

BOB and BETH video: MaaS London  
<https://www.youtube.com/watch?v=HlICvraIqxl>

- “The TravelSpirit Foundation was established in Manchester, UK, in 2016 to provide an open framework to ensure that new integrated mobility services are universally accessible”.
- Annual survey of MaaS (2018):
  - 85% are optimistic about MaaS (of which 31% are transport professionals, but only 4% are PT operators).

# The SocialCar approach

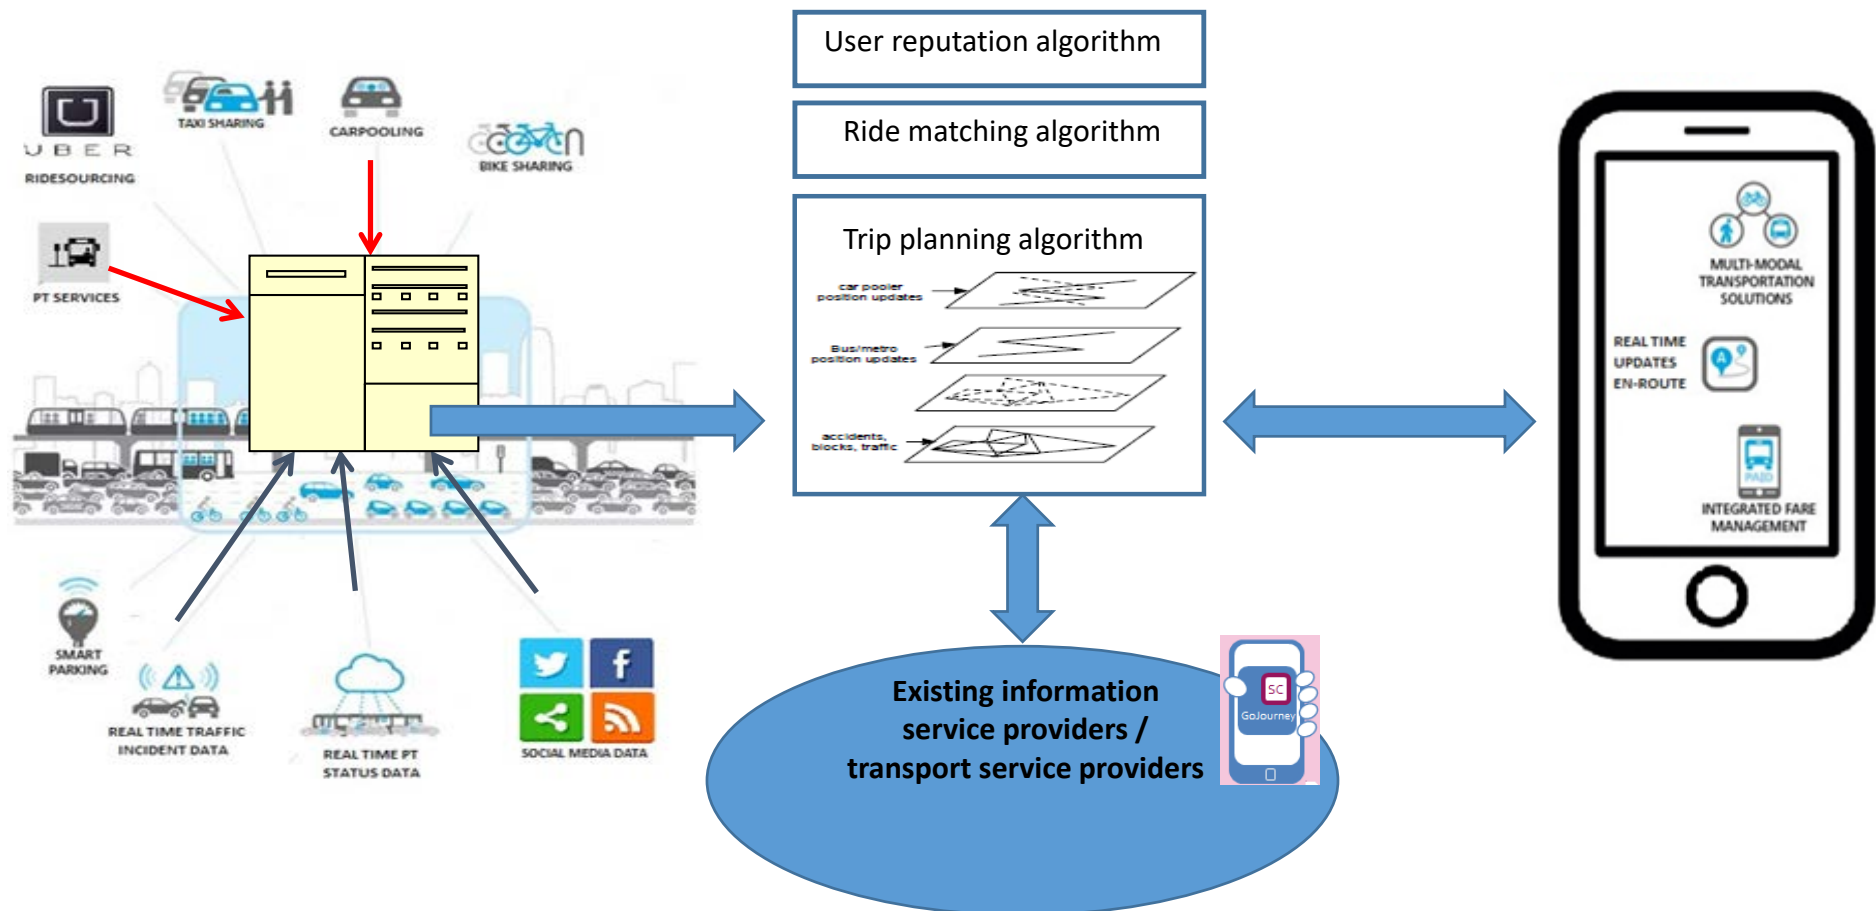

A new mobility platform integrating public transport and car-pooling services

## Backend server/database

## Software Algorithms

## RideMyRoute App

# SocialCar: what's new?

solo car use

Anna's estimated  
travelling time: 1 hour 5 min.

conventional trip planner

Anna's estimated  
travelling time: 1 hour 15 min.

SocialCar use

Anna's estimated  
travelling time: 40 min.

# Intention to use SocialCar

1072 respondents across 4 European cities

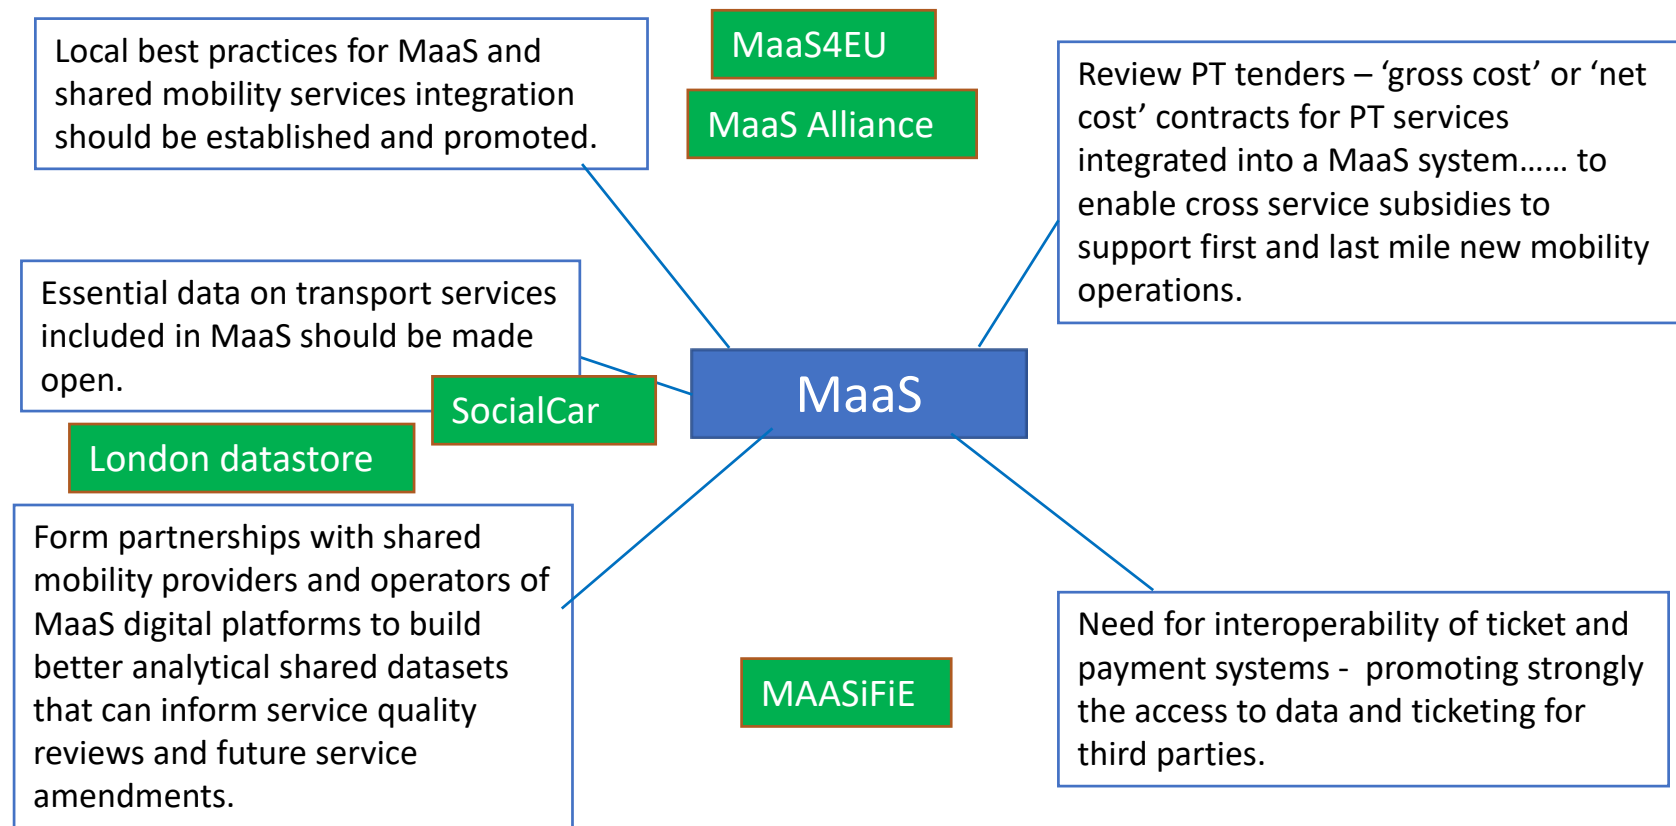

Level of interest and enthusiasm for the App from the public

## Intention to Use *SocialCar*

- decreases with increasing age and increasing income
- increases with increasing travel time
- Interest from car drivers - respondents from households with two or more cars have, on average, a 21% Intention to Use *SocialCar*
- More options for PT users - respondents who currently travel by bus for their most frequent journey show the highest Intention to Use *SocialCar* (28%)
- Experience of regular congestion and delays outweighs experience of using carpooling or of using other journey planners or social media, in Intention to Use *SocialCar*

# Data driven opportunities related to New Mobility Services

# Conclusions (1): Critical factors affecting the delivery of MaaS: UK perspective

- MaaS Scotland (2018) identify five critical factors affecting the delivery of MaaS:
  - interoperability between ecosystems;
  - digital connectivity;
  - data and API sharing;
  - regulation and legislation; and
  - skills needs and opportunities.
- To which we should add:
  - A sufficient availability of transport services for consumers to choose from

## Conclusions (2)

- The concept of *Mobility as a Service* is gradually becoming a market option in the UK
- Shared mobility options are increasingly prevalent – but we need more
- A structured approach towards planning new MaaS services is required - service design guidelines are still lacking
- Little attention to logistics – “Mobility on Demand”?
- The ephemeral nature of MaaS demonstrators is a major risk
