Kate Spalding, Parenting Research Centre
Wade Mahoney, Wandiyali
Kylie Evans-Locke, CareSouth
We acknowledge the tradition of custodianship and law of the Country on which the University of Sydney campuses stand. We pay our respects to those who have cared and continue to care for Country.

Tree of Knowledge - pokerwork on kangaroo skin, Lynette Riley, 2010
Outline

• Introduction and welcome
• Setting the scene: NSW permanency reforms, evidence review and permanency practice framework
• What do we know about evidence-based practices that support restoration?
• Overview of co-designing an outcomes framework in NSW
• Reflections on the co-design process
• Working Toward Restoration study – stay on for focus group
  • You can register for a later one and complete survey – email to follow
  • Questions? Put them in ‘chat’ and we will answer or direct to speakers at the end
Setting the scene: NSW permanency reforms, evidence review and permanency practice framework
 NSW permanency key legislative and practice changes

- **2012 – A Safe Home for Life**: Introduced specified time frames for decisions about restoring children to their parents and standard of ‘realistic possibility of restoration’
- **2014- Amendments to Care & Protection Act**: Embedded permanent placement principles, which prioritise legal guardianship with kinship or foster carers and for non-Indigenous children, open adoption with foster carers
- **2016 – Independent Tune review of OOHC**: Changes to contracts with out-of-home care to commission for outcomes (e.g., time to legal permanence)
- **2017 – Permanency Support Program**:

The University of Sydney
The need for a practice framework

Permanency practice is a new way of operating across the diverse NSW OOHC sector.

Use evidence and co-design to identify specific casework practices and necessary skills.

Inform processes and strategies for implementation in NGOs, with process evaluation identifying barriers and facilitators.
Evidence review purpose

- The Permanency Practice Framework is about practices and approaches for supporting parents and carers to have the required parenting supports, skills and confidence to be able to offer and sustain a permanent home to children through restoration, guardianship or open adoption.

- The evidence review examines practices that build the capacity of the adults who care for children in order to promote children’s development, wellbeing and safety.

- PRC has used review findings to inform the development of the practice frameworks with chosen sites, drawing on the evidence when exploring each chosen sites’ outcomes and existing practices (eg coaching parents and carers to have required skills and confidence).
What do we know about evidence-based practices that support restoration?
Common Elements of Permanency Practices for Reunification: Evidence Review

• This review systematically assessed current research about permanency programs and utilised a common elements approach to identify practices that support parents towards reunification.

• Search of published and grey literature for programs that have been evaluated using rigorous methodology (experimental and quasi-experimental designs) within US, UK, Ireland, Canada, New Zealand, and Australia.

• Studies published in English between January 2000 and September 2020.
Common Elements of Permanency Practices for Reunification: Evidence Review

• Practices undertaken by caseworkers to help parents develop the skills and confidence to support restoration

• Permanency outcomes that focus on:
  ➢ Stability - continuity of care over an extended period
  ➢ Security - lifetime relationships and a sense of belonging
  ➢ Safety - being protected from abuse and neglect
The screening process

- Records identified through database searching (n = 1064)
- Additional records identified through other sources (n = 238)

Records after duplicates removed (n = 832)

Records screened (n = 832)

Full-text articles assessed for eligibility (n = 78)

Articles included in review (n = 12)

Records excluded after title and abstract review (n = 754)

Full-text articles excluded (n = 66)

Reasons for exclusion
- Non-experimental, descriptive or qualitative article (n = 31)
- Outcomes not safety, security and stability as defined (n = 19)
- Review paper only (n = 9)
- Does not involve reunification (n = 5)
- Uses same data from included study (n = 1)
- Full-text unavailable (n = 1)
Overview of process

1. Assessment of Research
   Identifying interventions evaluated in research

2. Assessment of Intervention
   Data extraction based on study design, sample & key results

3. Practice distillation
   Drilling down to practices that compose the overall intervention
The common elements approach

E.g., well-evidenced and effective interventions (e.g., Intervention A and Intervention B) are comprised of Practices X, Y and Z.
**Programs and Practices**

- Parent Management Treatment Oregon (PMTO)
- Treatment Foster Care Oregon (TFCO)
- KEEP (Keeping Foster Parents Supported and Trained) program
- Promoting First Relationships (PFR)
- On The Way Home (OTWH)
- HomeBuilders
- Intensive Reunification Program (IRP)
- NewPin
- Child Parent Psychotherapy (CPP)
- Shared Family Care (SFC)

Note. EXP – Experimental; Q-EXP – Quasi-experimental; PT-PT – Pretest-posttest
Practice spotlight: Parent coaching

• Aims to observe and reinforce positive parent-child interaction skills.

• Observe parents in a structured interaction with their child and provide feedback before, during and after the activity. Parents learn problem solving techniques and to follow the child’s lead during play.
  ➢ Observation may be in person or behind a 1-way mirror with communication via a wireless device. The activity can take place in a support group or home visit. Feedback may be given verbally or using a video recording of an interaction.

Featured in programs: Child Parent Psychotherapy (CPP); Intensive Reunification Program; KEEP; Promoting First Relationships
Practice spotlight: Goal setting

• Aims to support parents to identify specific goals to address parenting problems

• Invite parents to identify areas that present parenting problems for them and set small, achievable goals around them for improvement.
  ➢ Practitioners offers support, skill building, reinforcement and monitoring of progress.

*Featured in programs: Intensive Reunification Program; KEEP*
Practice spotlight: Building motivation

• Aims to encourage parental motivation to change and improve engagement with parents

• Express empathy and build trust with the parent; and explore resistance to change (e.g., the discrepancy between parents' goals or values and their current behaviour)
  ➢ Building collaborative relationships with parents that are supportive and motivational

Featured in programs: HomeBuilders

The University of Sydney
PRC approach to practice development
Overview & aims

➢ Design an evidence-based practice framework for permanency which aligns with best available evidence for families and children transitioning through the out-of-home care system.

➢ Focus: Restoration, Guardianship, Open Adoption

➢ Funding: NSW Department of Communities & Justice
Phases of implementation

1. Discovery
2. Practice design or adoption
3. Installation
4. Early implementation
5. Full implementation
6. Sustainment
Exploration

1. Evidence review
2. Consultation on existing practice
3. Document review
4. Outcomes mapping process → outcomes chain
Design

1. Test outcomes chain against available evidence (evidence review)
2. Identify potential practices for the framework
3. Test and revise practices and tools with Design Teams
4. Document the practice framework
Reflections on the co-design process – Kylie and Wade

What interested your organisations most about the permanency practices project?
How has being involved in the project enriched the way you support restoration?
What key lessons stand out so far?
What are you looking forward to most about the next stage of the project?
Questions ?
Working Toward Restoration study

➢ To understand what professionals think helps or gets in the way of restoration
➢ From the perspective of professionals working with families
➢ Focus groups (after this webinar):
  ➢ In-depth discussion of main issues, beliefs and practices
➢ Q-Sort Survey:
  ➢ Rank series of statements about what evidence is used to assess whether there is a “realistic possibility of restoration” (s 83).
  ➢ Establish consensus across professions, locations, and settings
➢ Present themes and discuss implications for restoration practice in NSW
➢ Link to register for survey or focus group:
End of webinar

➢ About one hour
➢ You can leave at any time
➢ Will be audio recorded for research
➢ No one will be identifiable in reporting
