

The Faculty of Engineering is offering a prestigious scholarship program to support the development of individuals' engineering capacity through collaboration with select companies and industry partners around the world.

The scholarship program offers partner employees the opportunity to complete a PhD in engineering or computer science at the University.

Industry Postgraduate Research Scholarship

The Research Scholarship is offered to prospective Doctor of Philosophy (PhD) students for up to 3.5 years.

Program Benefits:

The **University of Sydney** will provide:

- academic course fees

The **Grantor** will provide:

- a living allowance (currently AUD \$37.2k per year and indexed annually)
- An additional sum of \$5,000 per annum to support students research expenses including attending conferences or buying specialist equipment.

About the Faculty:

The University of Sydney is ranked in the world's top 60 universities for engineering and technology. It is ranked first in Australia and fifth globally for graduate employability.

The Faculty's multidisciplinary research focuses on the areas of:

- biomedical engineering and technologies;
- data science and computer engineering;
- energy, resources and the environment;
- food product, process and supply chain;
- Infrastructure and transport;
- robotics and intelligent systems; and
- telecommunications and the Internet of Things.

The Faculty of Engineering comprises of six schools, 18 research centres, as well as four multidisciplinary initiatives.

It has industry connections with over 1,200 engineering, technology and government organisations, and a network of more than 25,500 alumni from engineering, computer science and project management.
