Coding Fest, launched in 2019, is a university-wide event to advocate a coding culture to students. It showcases interesting coding projects, connects like-minded thinkers, and engages students with industry. In 2022 it is expected to have about 150 attendees from various disciplines such as engineering, science, business, architecture, and medicine and health. This is a great opportunity for industry to engage with our students.

When
9am – 2pm AEST
Tue 31st May 2022 (STUVAC)

Where
The University of Sydney
