

Centre for Advanced Structural Engineering SUPAPURLIN

General specifications

SupaPurlin is a computer program for the analysis and design of SupaCee purlins manufactured by BlueScope. The sections can be designed with or without roof sheeting attached. SupaZed sections with roof sheeting can also be designed by modelling the section as an equivalent SupaCee section. The section to be designed is chosen from a library of standard sections.

Please note that this software is only available to Australian residents.

Download setup file

If the user wishes to obtain the program, a site key must be obtained, however commercial arrangements are applicable. To obtain a site key, the user must supply the site code for their computer and you will be contacted regarding the commercial arrangements. The site code is obtained by pressing ENTER when the SupaPurlin splash screen appears after starting the program. When the site key is typed in and Validate is pressed, the user will have a fully licensed copy of SupaPurlin.

To obtain a site key, email your site code to: steeldirect@bluescopesteel.com

Please also include the following information:

- Name
- Company
- Telephone

1. Download [specifications](#) (218.7KB)
2. Download [SP3setup.exe](#) (7.19MB exe) to your local drive (i.e your desktop)
3. Close all open applications
