

## Study schedules

Because many units of study have pre- or co-requisites, and some are offered in one semester only, we show below our recommendations for the way you might structure your program of study, depending on what you have studied to date, and hence what waivers you have.

The examples are not exhaustive and variations are possible. You may wish to discuss your own program with the Biostatistics Program Director, A/Prof Patrick Kelly, (02) 9036 5337, [p.kelly@sydney.edu.au](mailto:p.kelly@sydney.edu.au).

Note that BAY and BIF are offered in alternate years. See our [website](#) for details.

Students may also take [PUBH5215 Introductory Analysis of Linked Data](#), which is a BCA-endorsed elective, available as a one-week intensive in late June and November each year in Sydney.
