

Project Title: Are males who ride bicycles at risk of developing testicular cancer?		Code: NEP2
Host School / Institute: Nepean Clinical School	Address: Nepean Clinical School Building, 62 Derby Street, Penrith	
Certificates & Clearances required: No		
Primary Supervisor: Prof Guy Eslick		
Phone: 0417 433 914	Email: guy.eslick@sydney.edu.au	
Co-Supervisor/team: N/A		
Project Type: Literature Review; Data Analysis		
Project Category: Cancer; Epidemiology		
Skills / Attributes of a successful student: Motivated individual, interested in epidemiology and hard working		
Project Keywords: Cycling; Testicular cancer; Risk factors; Prevention		
Project Description: Currently, there are some research studies suggesting that males who ride bicycles may be at an increased risk of developing testicular cancer. However, the published research studies are conflicting. The aim of this project is to review all the current literature using a systematic methodology and provide evidence for or against a relationship. This project will involve undertaking systematic literature searches, collating the data, critically appraising the literature, undertaking data analysis and writing a manuscript for publication.
