

### Sustainability, Communications and Education Example Study Plan

Being able to educate children and adults about sustainability is crucial to achieving a sustainable world. Having a broad-based knowledge of sustainability and the myriad of implications it has for how we live will benefit teachers themselves, as well as people everywhere.

If your career aspirations are to educate children or adults in the course of your sustainability work, communicate sustainability with the public, or to be able to apply sustainability knowledge to your existing career in education or media, this study plan will be of interest to you.

An example Sustainability and Education study plan might look like:

Qualification		Unit type	Unit code	Unit name	Credit points	Semester	
Master	Graduate Certificate	Core	SUST5001	Introduction to Sustainability	6	1, 2
