SYDNEY

**The Henry
Halloran
Research Trust**

Research Seminar and Publication Scheme

Stimulating scholarly debate, dialogue and collaboration

The Henry Halloran Research Trust (HHRT) supports cross-disciplinary research that informs urban and regional policy, planning, and the built environment. We aim to advance scholarly contributions to these fields by leveraging the diverse disciplinary strengths across the University of Sydney's many academic units and collaborators, while also promoting wider engagement across policy makers, practitioners, and the wider community.

The Research Seminar and Publication Scheme offers funding for academics from various disciplines to host a workshop or seminar program on a theme relevant and aligned with the research interests of the Trust. This year the Trust is particularly interested in proposals which address these research interests with reference to the themes of climate change, Indigenous land, or socially just cities and regions.

Focus and Publication Goals

The seminar should focus around a set of papers intended for publication as a special issue for a peer reviewed journal or as an edited book.

Eligibility and Participants

Proposals led by a University of Sydney academic/s with a clear publication strategy for a collection of research papers or chapters addressing the research themes of the Henry Halloran Research Trust are eligible for funding. However, seminar participants are not be limited to the University of Sydney and should include other Australian and potentially international researchers. Academics may also have funding from other sources for their work.

Proposal Requirements

Proposals for funding should address:

- The relevance of the proposed seminar theme to the research interests of the Trust
- The potential to leverage a 'cross disciplinary' lens in addressing this theme

- The potential to provide opportunities for earlier and mid-career, as well as senior academics in organising and or participating in the seminar and subsequent publication
- The plan to publish all or selected papers presented at the seminar
- The relevance of the proposed seminar theme and related research to urban policy and potential for a public event, such as a lecture or panel open to the public or a targeted audience, to coincide with the seminar

Funding Details

Funding of up to \$30,000 is available to cover modest travel and accommodation expenses, as well as catering for a 2-day workshop. This funding may also be allocated to support editing / publication expenses, provided that these are properly justified. Journal / book publishing fees will not be funded.

Awards and Application Process

The Henry Halloran Research Trust Advisory Board will determine awards under this scheme. The Trust will make **up to two** awards under this scheme per year.

Application cut off dates

- 30 November (for consideration at the Board's December meeting)
- 30 May (for consideration at the Board's June meeting)

The Trust reserves the right not to offer an award if it considers that applications are not of sufficient merit.

Contact Information

Questions should be submitted via email to:

Professor Nicole Gurrán, Director, Henry Halloran Research Trust

Email: Nicole.gurrán@sydney.edu.au

Applications should be submitted via email to:

Jacqueline Tyrrell, PhD Candidate

Senior Research Administration Officer, Henry Halloran Research Trust

Email: jacqueline.tyrrell@sydney.edu.au

Guidelines for Henry Halloran Research Trust Research Seminar and Publication Scheme Proposal

1,000 words not including CV

1. Introduction

Provides a background to the issue and highlights its relevance to the research interests of the HHRT.

2. Seminar description and contribution

Describe the anticipated range of papers and researchers as well as the proposed format for the seminar. Explain the expected contribution of this body of work to the field, and any cross disciplinary elements. Identify the opportunities for cross disciplinary / institutional research collaboration and mentoring of earlier career researchers.

3. Publication plans and timelines

Identify and justify anticipated publication outlet for the papers presented and developed through the seminar, and a process and timeline for developing the papers. Include peer review processes, if applicable.

4. Public Event

Provide details of the anticipated public event to coincide with the seminar, including target audience and schedules.

5. Budget

Provide a budget. Funding must be used within 12 months of the award.

6. Researcher CVs

Provide a short (1-2 page) CV of the lead researcher / research team.
