

Marie Bashir Institute

Research node submission

Find out about our research nodes and how to submit an expression of interest.

Research strategy

The Marie Bashir Institute for Infectious Diseases and Biosecurity (MBI) is committed to meeting the challenge of emerging and re-emerging infectious diseases, by: increasing capacity within Australia and Asia Pacific nations to detect and respond to infectious disease outbreaks in humans and animals; and informing and assisting in the development of policies and strategies to prevent, contain and control emerging and re-emerging infectious diseases.

Submission requirements

- Node title
- Brief description of the node in 4-6 sentences
- Leadership team including node leader and theme leaders
- Proposed activities and/or research strategies – can be brief and further refined
- Expected outcomes
- Funding potential

Each research node has

- multidisciplinary representation of at least three faculties and/or disciplines
- an education or outreach component, eg short course, seminar or conference
- a strategy which complements and/or advances the overall strategy of the Marie Bashir Institute.

Each node will be provided with

- support to include access to networks, linkages, PR, etc
- \$5,000 annually from MBI core for meetings, etc
- potential partial funding from the DVC-Research's office for successful large grants
- administrative and program support from the MBI Project Officer.
