COVID-19 HOPE TOOLKIT
Help Options for Preparedness in Emergency

for Pacific Families in NSW

Compiled by Donina Va’a

Core Pacific Collective
NSW Council for Pacific Communities
Pacific Women’s Professional Business Network
Pacific Islands Mt Druitt Action Network
Core Pacific Mental Health Group
Social Work and Policy Studies, The University of Sydney

“By Protecting oneself we are saving a life of another and keeping our family together”
Young Person

The Core Pacific Collective received requests for COVID-19 resources to be accessible and easy to comprehend. Multicultural NSW funded the compilation of the COVID-19 HOPE KIT and translations in five languages. The purpose is to enable the Pacific communities to easily access COVID-19 health related information from NSW Health and other reliable sources on protocols and support.

Version 06/02/2022
NSW Council for Pacific Communities/Core Pacific Collective
Acknowledgement

‘The Core Pacific Collective would like to acknowledge the Australian Aboriginal and Torres Strait Islander people of this nation. We acknowledge the traditional custodians of the lands on which we learn, live and work. We pay our deepest respect to their Ancestors and Elders, past, present and future.

We are, and always will be committed to honouring Australian Aboriginal and Torres Strait Islander peoples’ unique cultures and customs that continue to nurture this land. We honour the presence of their ancestors and their spiritual relationships to the land, waters, seas and their rich contribution to society.’

“I wish we, as a family had both our vaccinations! Our journey, that my family endured, the emotional pain and suffering will never be forgotten. Messages of prayers, love and support, being strong and thinking positive from Family and Friends helped mend my FAMILY together.” Susan Raukete
Getting Vaccinated

COVID-19 VACCINATION GETTING VACCINATED

NSW Health recommends everyone to get COVID-19 Vaccinated.
We must work together to get vaccinated to protect ourselves and our loved ones.
If you have any questions about getting vaccinated – talk to your doctor.

COVID-19 VACCINATION FACTS
• It’s free. No charge

3RD PRIMARY DOSE OF COVID-19 VACCINE
• Australian Technical Advisory Group on Immunization (ATAGI) recommends a 3rd primary dose of COVID-19 vaccine for people whose immune systems do not work

PROOF OF VACCINATION
You will receive a COVID-19 Vaccination Certificate, once fully vaccinated (2 doses)

TYPES OF VACCINES AVAILABLE IN AUSTRALIA
To get fully vaccinated you will receive two doses. According to health officials, you can expect to get up to 90% protection from hospitalization or death, 7-14 days after your second dose.

COVID BOOSTER ADVICE (FROM JANUARY 31ST 2022)
• ALWAYS check updated information
• EVERYONE AGED 18 AND OVER IS RECOMMENDED TO HAVE A BOOSTER DOSE THREE MONTHS AFTER THEIR PRIMARY COURSE

"Thank you so much to PIMDAN, to you Maherau and your team from my 80-year-old mum and myself for being there for the vulnerable community." Shantishwar Lal
Getting Vaccinated

COVID-19 VACCINATION
GETTING VACCINATED

How to get a COVID-19 Vaccination:
- Contact your Doctor
- Go to the online Vaccination finder
- Find a walk in
- Non-Medicare card, Contact your local doctor or attend a GP
- Vaccination clinic or a NSW Health clinic, many GPs do not do “non-Medicare” vaccination

COVID-19 VACCINATION FACTS
- It’s free. No charge
- It is easy to access. Even if you do not have a Medicare Card or a Visa
- It is safe. Therapeutic Goods Administration (TGA) have ‘approved’ all vaccines administered in Australia
- It protects. Covid-19 vaccines help protect you against contracting and spreading the virus
- It defends. Reduces your chances of hospitalization or death if you contract Covid-19

PROOF OF VACCINATION

A digital copy of your certificate can be downloaded from the following sites:
- Medicare Express App
- MyGov Account
- My Health Record
Or your vaccination provider can print your immunization history statement
Keep a copy of your certificate with you always.

3RD PRIMARY DOSE OF COVID-19 VACCINE

- Australian Technical Advisory Group on Immunization (ATAGI) recommends a 3rd primary dose of COVID-19 vaccine in individuals who are severely immunocompromised, to maximize the level of immune response
- Applies to all individuals aged ≥ 18 years with certain conditions or on therapies leading to severe immunocompromise, as defined in Box 1 (see in Resources)

IMPORTANT TALK TO YOUR DOCTOR

TYPES OF VACCINES AVAILABLE IN AUSTRALIA

- Pfizer
  - Preferred for the ages of 5 years and older
  - Requires 2nd dose 3-8 weeks after your first dose
- AstraZeneca
  - Used for 60 years and over or for 18-59 years where the Pfizer vaccine is unavailable
  - Requires 2nd dose set 3-8 weeks after your first dose
- Moderna
  - Used for 60 years and over or for 18-59 years where the Pfizer vaccine is unavailable
  - Requires 2nd dose 4-6 weeks after your first dose

COVID BOOSTER ADVICE

- The TGA has provisionally approved COVID-19 booster doses for people aged 18 and older
- ATAGI have recommended a third COVID vaccination (a booster) to eligible people, at least six months after the second dose
- Pfizer or Moderna vaccines are approved for the booster shot, regardless of what vaccine type was used for the primary doses

The priority groups to get booster doses are those with risk factors for severe COVID-19 and/or those at increased occupational risk of COVID-19. This includes health care staff.

Booster doses are not currently recommended for those aged under 18 years, as severe COVID-19 is uncommon for this age group.

- Where to get booster vaccinations
  - NSW Health run clinics, GPs and pharmacies
- Contact your doctor for further information

“COVID-19 Safe, United we stand Vaccinated.” Sarah & Roy
Getting a COVID-19 Test

1. Getting tested for COVID-19
   - If you have flu-like or COVID-19 symptoms
   - If you are a close or casual contact of someone who has contracted COVID-19
   - If you have visited a hotspot listed on NSW Health website
   - If you have been requested to get tested

2. If you have tested positive, NSW Health Department will let you know by SMS
   You will be given clear advice

3. If you had COVID-19 more than 4 weeks ago and you experience symptoms, call your doctor, self-isolate and get tested

4. Close Contact Testing – household contacts or people with high risk exposures
   Close contacts are at high risk of catching COVID-19 because of their interactions with someone with COVID. Get tested at a clinic or drive through (not a supermarket test) and isolate until you get a result. Follow the directions from NSW Health about how long you need to stay isolated for.

5. Casual Contact Testing – if you are a casual contact of someone with Covid-19
   - Get tested immediately and self-isolate until you get a negative result
   - Get tested again on day 6 after your last contact with the COVID-19 positive person. If you feel well, you do not need to self-isolate while waiting for this test result
   - Get tested at a clinic or drive through (not a supermarket test) and isolate until you get a result. Follow the directions from NSW Health about how long you need to stay isolated for.

6. Where can you get tested?
   - at a hospital
   - in your car at a drive through clinic
   - at your local doctor’s office
   - at a COVID-19 clinic
   - You can take someone with you to get tested but they must wear a mask

7. What is it like to get tested for COVID-19?
   COVID-19 testing is:
   - easy
   - quick
   - free
   You must go straight home and self-isolate after your COVID-19 test.
   This means while you wait for your results, you should not:
   - leave your home
   - have visitors at your home

   You can get your results by:
   - text
   - phone call

   If you don’t get your results within 3 days, you should contact the place where you got tested.

HELP
Contact your Doctor or call Health direct 1800 022 222
If your life is in danger call 000.

## RAT and PCR Testing

There are different tests you can get to check if you have coronavirus (COVID-19)

- **Rapid antigen tests**
  - A rapid antigen test is a quick way to detect COVID-19
  - Concession card holders can access free RAT tests from 24th January 2022

- **PCR tests**
  - This is a nose and throat swab that is taken at a testing clinic and sent to a lab to be tested

### Who should do a rapid antigen test?

- People with symptoms
- Household, social, workplace or education contact of a positive case
- Anyone before going to an event with lots of others, or before visiting vulnerable family members
- Anyone arriving from overseas (passengers and flight crew)

### What happens if I get a positive rapid antigen test result?

If you test positive on a rapid antigen test you most likely have COVID:

<table>
<thead>
<tr>
<th>TEST RESULT</th>
<th>SYMPTOMS</th>
<th>EXPOSURE RISK</th>
<th>NEXT STEP</th>
</tr>
</thead>
<tbody>
<tr>
<td>✓</td>
<td>✓</td>
<td>Known or unknown contact</td>
<td>You are a confirmed case, follow the advice for people testing positive for COVID-19 <a href="https://www.health.nsw.gov.au/Infectious/factsheets/Pages/advice-for-confirmed.aspx">https://www.health.nsw.gov.au/Infectious/factsheets/Pages/advice-for-confirmed.aspx</a></td>
</tr>
<tr>
<td>✓</td>
<td>✓ or ✗</td>
<td>Known high risk or household contact</td>
<td>You are a confirmed case, follow the advice for people testing positive for COVID-19 <a href="https://www.health.nsw.gov.au/Infectious/factsheets/Pages/advice-for-confirmed.aspx">https://www.health.nsw.gov.au/Infectious/factsheets/Pages/advice-for-confirmed.aspx</a></td>
</tr>
<tr>
<td>✓</td>
<td>✗</td>
<td>No known contact</td>
<td>You may be a case, take another rapid antigen test in 24 hours or have a PCR test</td>
</tr>
</tbody>
</table>

### What happens if I get a negative rapid antigen test result?

If you are a household contact or had a high-risk exposure to someone with COVID then you must continue to isolate for 7 days. You must follow the advice for people exposed to COVID-19 to determine your risk [https://www.health.nsw.gov.au/Infectious/factsheets/Pages/people-exposed-to-covid.aspx](https://www.health.nsw.gov.au/Infectious/factsheets/Pages/people-exposed-to-covid.aspx). To determine if you had a high risk exposure use the information for people exposed to COVID-19 [https://www.health.nsw.gov.au/Infectious/factsheets/Pages/people-exposed-to-covid.aspx](https://www.health.nsw.gov.au/Infectious/factsheets/Pages/people-exposed-to-covid.aspx) and follow the relevant isolation advice.

If you have symptoms, please take another rapid antigen test in 24 hours or have a PCR test. If your second test is positive you are considered a confirmed case. If the second test is negative, you should isolate until your symptoms have gone.

### Who should have a PCR test?

You should do a PCR test if:
- you have COVID-19 symptoms, but have tested negative on a rapid antigen test AND are at higher risk of severe disease including those who are pregnant, immunosuppressed, Aboriginal and Torres Strait Islander, Pacific Islander, or unvaccinated
- you have symptoms and can’t get a rapid antigen test
- you have been asked to have a PCR test from a health care provider.

### If I have tested positive, what do I do?

Symptoms of COVID-19

COVID-19 SYMPTOMS

Common Symptoms

- Fever (37.5°C or higher)
- Cough
- Fatigue
- Loss of taste and/or smell
- Night sweats
- Chills
- Headache
- Sore throat
- Blocked nose
- Runny nose
- Muscle pain
- Joint pain
- Diarrhoea
- Nausea or vomiting
- Loss of appetite
- Conjunctivitis

Severe Symptoms

- Severe headaches
- Dizziness
- Shortness of breath
- Difficulty breathing
- Chest pressure or pain
*If you have severe symptoms, Call 000 immediately

What can you do when you have symptoms?

Protect your family and don’t wait till symptoms get worse

Get TESTED immediately, if you have COVID-19 symptoms, even if mild and even if you are vaccinated

Do a RAT test OR go to nearest testing clinic and do not stop or visit shops or people to and from the clinic. Tell the testing clinic staff if you are a close contact of a person with COVID-19

You must not travel by public transport, taxi or ride-share

Wear a face mask that always covers your nose and mouth

If you cannot get to a testing clinic, call your doctor for advice on testing

If your Doctor is unable to help, call the NSW Health Isolation Support Line on 1800 943 553

Self-isolate until you receive a negative result

If your symptoms become serious you may need to go hospital

We use oxygen, and in severe cases ventilators if you need help breathing

TALK to your Doctor for any other concerns

More info: www.covid19evidence.net.au
Self-isolating when Affected by COVID-19

1. **YOU MUST SELF-ISOLATE**
   - When tested positive for COVID-19
   - If you are a close contact of a person with COVID-19 and awaiting results
   - If you are a casual contact and awaiting your test results (even if fully vaccinated)
   - Have any COVID-19 symptoms and awaiting test result (even if fully vaccinated)

2. **COPING TIPS**
   - **DO A DAILY ROUTINE**
   - **STAY IN TOUCH**
   - **SET AN ENJOYABLE EXERCISE ROUTINE**
   - **EAT HEALTHY**
   - **WELL-BEING PROGRAMS**
   - **SEEK SUPPORT**

3. **DON’T LEAVE THE PLACE OF RESIDENCE**
   - LEAVING HOME - only leave to get a COVID-19 test, medical care or in an emergency.

4. **COMPLY WITH SELF-ISOLATION RULES**
   - TRAVEL - travel by private vehicle, bike ride or walk
   - Call the Isolation Support Line on 1800 843 553 if you need transport.
   - Failure to adhere to the NSW Health advice may result in a penalty.

5. **COVID-19 POSITIVE SELF-ISOLATION**
   - Diagnosed cases must take practical steps to notify:
     - Employer
     - Any people they live with
     - Social contacts
     - Education provider
     - Person conducting a business to notify SafeWork NSW if they become aware a worker was diagnosed with COVID-19
     - Keep up to date with the rules and exemptions in place

6. **MONITOR YOUR HEALTH DAILY**
   - Don’t wait till symptoms worsen, Call 000 if life in danger.

7. **YOU CANNOT SELF-ISOLATE AT HOME**
   - Special Health Accommodation is Free and caters for those who cannot self-isolate at home
   - 24-hour care is provided, 7 days a week. Call Public Health Unit 1300 066 055
   - Services include Meals, WiFi, TV, cleaning, and laundry services

8. **PRACTISE STRICT HYGIENE**

9. **ISOLATING WITH OTHERS**
   - Family in the same house may be appropriate provided you understand there is an increased risk of infection, and they may need to test and isolate
   - You must avoid all physical contact from others if living in the same house

See NSW Health Links & Resources - NSW Health COVID-19 Self-isolation Guideline and Support for more information
COVID-19 - Testing Positive and Managing at Home

If YOU test positive with a rapid antigen test, you must:

- Register your positive test on the Service NSW website so you can be linked to important healthcare support and advice based on your COVID-19 risk. If you cannot register online, please call Service NSW on 13 77 88.
- When positive, you will be required to complete questions or a survey to determine whether you are at risk of severe disease.
- You will also be sent advice on self-isolation and how to look after your illness at home.

Exposure to someone with COVID-19 again

- If you come into contact with someone with COVID-19 within 28 days after you are released, you will generally not need to self-isolate or get a test unless you have symptoms.

See NSW Health Links & Resources
- Information for People Exposed to COVID-19

How will I know I have COVID-19?

- Most people can use a rapid antigen test (RAT) result to confirm they are positive for COVID-19.
- This includes people with symptoms, people who live with someone who has COVID-19, people who have spent a long time with, or interacted closely with someone who has COVID-19, and people who have travelled internationally within the last 14 days.
- Only some people are required to get a confirmatory PCR (nose and throat) swab.

Managing COVID-19

- If you are at risk of severe disease, you will be linked to NSW Health clinical services.
- If you are under 65, vaccinated, do not suffer from any chronic health conditions, not pregnant, you can safely look after yourself at home.

Most symptoms can be managed with:
- Bed rest
- Good nutrition
- Regular paracetamol and ibuprofen to relieve pain and fevers
- Throat lozenges for a sore throat
- Keeping hydrated with regular sips of water

STAY UP TO DATE FOR NEW CHANGES

If you test positive with a PCR or rapid antigen test:

1. You and your household must isolate immediately for 7 days. If you have symptoms after 7 days, remain in isolation until 24 hours after your symptoms have resolved.

2. Make a list of all places you have been to, and people you have come into contact with 2 days before you started having symptoms or 2 days before you tested positive.

3. Tell people (by phone, text or email) that you have COVID-19. This includes your social contacts, workplace and/or school, as well advise venues you have visited.

4. If you are concerned, call your GP, the NSW Health COVID-19 Care at Home Support Line on 1800 960 933 or the National Coronavirus Helpline on 1800 020 080. If symptoms become severe call 000.

Ask your doctor about COVID-19 symptoms and medical treatments

Contact your GP or call the NSW Health COVID-19 Care at Home Support Line on 1800 960 933 if you are at high risk of severe disease.
If you are pregnant and have COVID-19, contact your Doctor.
“Faith is my road to recovery. God is in the warmth of the sun, the knowledge from the doctors, the tireless efforts of the nurses, the tremendous support from the community, and the love of family. Have faith! Let’s do our part, for a better and safer future.” Anonymous
Information for Seniors and Vulnerable People

1. **COVID Safe advice for Seniors and those Vulnerable to COVID-19**
   - Be aware, ask questions and Talk to your Doctor
   - NSW Health advises you to limit your activities and outings to protect yourself
   - Stay COVID Safe – Practice Life with COVID-19 protocols especially:
     - Get active, go for walks, try and move every hour
     - Eat healthy balanced meals that are wholefoods, fresh and nutritious
     - Drink lots of water
     - Good hygiene
     - Stay in contact with your family and friends
     - Stay up to date with COVID-19 Rules
   - Attend all your medical appointments
   - Follow the rules that apply when going to church, attending weddings and funerals
   - Some residential aged and disability care facilities have restrictions on visitor entry

2. **Those who are considered Vulnerable Persons**
   - People who have a diagnosed chronic medical condition and/or a compromised immune system and can suffer severe effects from COVID-19 and so are advised to be extra safe and protected
   - People who live in group residential aged care facility. We can keep these people protected by:
     - Staying in touch virtually
     - Not visiting when you are unwell
     - Conduct your visits outdoors if possible
     - Maintain physical distancing
     - Dropping off essentials if they need support

3. **Resources for Seniors and Vulnerable People**
   - Need help figuring out what is best for you?
   - Call Service 13 77 88 for Supports with Groceries, Medication, Financial etc
   - NSW Seniors Card provides updates on COVID-19, discounts, and offers for seniors
   - Apply for a Seniors Card/Senior Savers Card to access the above
   - See Resources for links to Available supports

Service NSW Phone: 13 77 88

**FACT:**
COVID-19 vaccines do not have tiny technology in them, such as: Software and Microchips.

People of all ages can be infected with the new coronavirus (nCoV-2019)

**Does the new coronavirus affect older people, or are younger people also susceptible?**

Having a COVID-19 vaccine does not mean you will be tracked.
Information for People not Vaccinated

**VACCINATION**

Vaccination, not compulsory for most Australians

But if you work in certain industries, you may need a vaccination.

Check NSW Health or your employer for more information.

**SUPPORT**

Vaccination will not affect Support

If you choose not to have a COVID-19 vaccination, this won’t affect your family’s eligibility for Family Tax Benefit (FTB), Parent & Child Care Subsidy (CCS).

**TRAVEL**

Travel and COVID-19 vaccination

Many destinations or work in high-risk environments, may require vaccination. If so, there may be exemptions for people who are unable to be vaccinated.

**HEALTH CARE RESPONSIBILITIES**

Understand the Risks and Responsibilities

Talk to your Health care professional if you are ill or have any concerns. Do not be ashamed. Tell them if you are not vaccinated, so that they can provide the best care. Stay up to date with the COVID-19 rules.

**EXEMPTION**

Vaccination rules do not apply to people who are at your premises to:

- assist vulnerable members, e.g., a food bank, service providing for the homeless persons
- purchase food to be consumed off the premises including take away from a food court to eat outside
- attend a small funeral or memorial service or small wedding service
- use a click and collect service
- provide an emergency service
- auction for food supply, fibre, livestock or crops
Preparing for a Pandemic

1. **COVID Planning**
   - **MAKE** your own Covid-safe plan. See **Resources** for a template to use for your plan.
   - **SAVE** on your phone and have a hard copy easily accessed.
   - **PRINT** a copy of the HOPE Toolkit and place where easily accessed.

   Think how you will:
   - ✔ Take care of your children or family dependents
   - ✔ Access medical services or supplies
   - ✔ Get groceries and home supplies
   - ✔ Get support services for family dependents who have disabilities
   - ✔ Manage work and access to financial support

   Contact a service provider, NSW Council for Pacific Communities or a Pacific Link to help with your plan

2. **Communication**
   - **CHECK** you have a device (with chargers) to stay in contact with all key persons. This can be your phone, laptop or tablet and ensure you have internet access or adequate data credit ready.
   - **MAKE** a list of key contacts - doctor, specialists, family, children, school, work, supports.
   - **SAVE** on your phone and have a hard copy

   NSW Health COVID-19 Care at Home Support Line 1800 960 933

3. **Connecting**
   - **STAY** connected
     - Connect to yourself, be active and try something new that makes you feel good
     - Connect with family and friends
     - Connect with your spiritual self

4. **STOCK UP a 30 day supply and for Medical supplies - ask your doctor**

5. **COVID-19 Home Care Kit - Managing at Home**
   - **Symptom relief** such as Paracetamol
   - **Food and drink**
   - **Thermometer** - seek medical help if you are over 39.5°C
   - **Your usual medications & rapid antigen tests if available**
   - **Toys for kids**

   **More for the Home Care Kit**
   - **Symptom relief**: soothers, lozenges, vit C, vit D, zin, cold n flu tablets, panadol, ice packs, water packs, heat packs
   - **Food and Water**: dehydration – Hydralyte sports drinks, icy poles. Non-perishable and plain foods, water, plan for how to get groceries – online orders, friends & family
   - **General**: pet food. Include hand sanitizer, cleaning products, toilet paper
   - **Thermometer**: Monitor your temperature, Over 38°C – Paracetamol can help, Over 39.5°C – seek medical help
   - **Essentials**: Your usual medications – ensure a 2 week supply, Rapid antigen tests (if available) and Toys / Activities for kids (see Resources for children activities)

---

**Is Vitamin C an effective treatment?**

There is no scientific evidence to support the usage of Vitamin C in the treatment of COVID-19.

---

**Does Ibuprofen exacerbate coronavirus?**

There is no published peer-reviewed scientific evidence to support this claim.
ROAD TO RECOVERY
- Is different for Everyone
- Many people make a full recovery within 12 weeks, some people do not
- Medical clearance – you will have received a text message or email confirming the end of your isolation period, when no longer infectious
- Always keep the medical clearance notice with you always

SAFETY AND LONG-TERM EFFECTS
Symptoms can persist for longer than 12 weeks, may change over time and new symptoms may develop.
MUST DO:
- Follow the current rules
- Do regular medical checkups
- Discuss ongoing or worsening symptoms with your doctor
- GET tested – if it has been more than three months since you recovered and if you have symptoms
- Routine COVID-19 testing with no symptoms is not recommended, six months post recovery, COVID-19 tests maybe positive for a while. BUT check the rules prior to travelling interstate
- Get your vaccination if you have fully recovered
- Talk to your doctor if unsure
- Public Health orders require some to be vaccinated
- Get a temporary medical exemption to COVID-19 vaccination from your GP if needed. Check the rules that apply in your state

MANAGING RISKS & GRIEF
Exposed to someone with COVID-19 again
If you are in contact with a COVID-19 case in the 6 months following your infection, you will generally not be considered a close contact and will not need to self-isolate or get a test unless you have symptoms.
Grief, Bereavement and Mental health support
- Post COVID-19 can leave you with either grief from loss of a loved one, or grief from psychological after effects like trouble focusing, remembering, depression or anxiety.
  You need to:
  ✓ Tell a health professional
  ✓ NSW Health has partnered with Sonder to provide a personal wellbeing service, download the free Sonder Wellbeing & safety app

RETURN TO NORMAL ACTIVITIES
Yes you can, with a MEDICAL CLEARANCE!
LIVE Life with COVID-19 protocols especially HYGIENE!
“Let’s be kind to each other”
IT IS NOT SHAMEFUL!
“Thank you for sharing information about the close contact”
“Thank you for wearing a mask”
“Thank you for social distancing”
STOP harassment and violence toward people who are following public health guidelines, have symptoms or recovered from COVID-19

HELP
Questions or concerns, speak to your local doctor | See RESOURCES for further help information
MENTAL HEALTH TALANOA (MHT) TOP 5 TIPS TO SUPPORT THE WELLBEING OF YOURSELF AND OTHERS

The following tips are about maintaining your wellbeing with yourself and others in a proactive way. We encourage putting these into practice on a regular basis to help prevent feeling overwhelmed and to support a collective response across your family and community towards an ongoing mental health talanoa.

**CONNECT WITH YOURSELF**
- # Listen to your body and be kind to it
- # Rest, get fresh air, sleep and hydrate

**CONNECT WITH ENJOYMENT**
- # Do something you enjoy which could be a hobby or recreational activities
- # Nurture Va through spirituality including church, prayer, meditation, mindfulness and nature

**CONNECT WITH INFORMATION ABOUT MENTAL HEALTH AND WELLBEING**
- # Access reliable information including the Mental Health Talanoa Research and Resources
- # Talk with your support people to share knowledge and information

**CONNECT WITH SERVICES**
- # Reach out to free professional health services including in person and online counselling services and your local Doctor
- # Maintain a relationship with your health professional and the goals you create

**CONNECT WITH OTHERS**
- # Create a list of who your support people are
- # Intentionally organise times to catch up via technology or in person

Adapted from Clinical Excellence Commission COVID-19 Infection Prevention and Control Manual for acute and non-acute healthcare settings
7 WAYS TO INCREASE RESILIENCE AND WELLBEING

Your health is the first step towards living a happy and meaningful life!
- Life with COVID-19 protocols will protect you, maintaining hygiene disciplines, mask protection, social distancing and getting fully vaccinated
- Strengthening your immune system and building resilience can help reduce risks of contracting, spreading, and suffering from COVID-19

1. SLEEP
Sleep 7–9 hours per night.
Sleep is when your body repairs, renews, refreshes, detoxes (especially your main organs and the BRAIN), fat-burns (yes this is a natural intermittent fasting time).

2. HYDRATION
Drink 2–3 litres of water every day.
We need top hydration for top immune function.

3. SUNSHINE AND FRESH AIR
Getting sunlight means you must get outside.
Getting safe sunlight helps you build Vitamin D levels which is associated with increased autoimmunity and improved susceptibility to infections.

4. EXERCISE AND MOVEMENT
Regular exercise has a notable protective effect against contracting COVID-19 and, regular exercise appears to slash the risk of severe COVID infections or death from COVID-19 (British Journal of Sports Medicine).
Check with your doctor if you have any health concerns before you start any new program.
Small and easy movements daily can improve your health significantly.

5. HEALTHY EATING
When you eat the right foods, as nature intended, your food becomes your best medicine.

6. STRESS MANAGEMENT
COVID-19’s has increased fear and anxiety for many.
Stress can be an instigator of disease and make it difficult to fight against COVID-19.
Make sure you are aware of stressors in your life and do things to overcome them.

7. SOCIAL CONNECTION
We are created to socialize with each other.

CHECK OUT TIPS FOR THE ABOVE METHODS IN THE NEXT PAGE
7 WAYS TO INCREASE RESILIENCE AND WELLBEING - TIPS

1. SLEEP
   i. Go to bed at the same time every night and wake up at the same time every morning so your body can set a natural circadian rhythm. Even on the weekends!
   ii. Switch off all screens at least 1hr (even 1/2hr helps) before you go to bed. Dim all your house lights at sundown.
   iii. Stop caffeine 8 hours before bedtime and avoid alcohol before bed – one of the worst sleep disruptors that affects the brain.
   iv. Have a 20–30 minute bedtime routine that includes a wind-down like a hot shower, meditation, prayer, journaling, a 10 min Yoga stretch routine works, reading books.
   v. Get 5 mins of morning sunlight on your face – this kick starts melatonin production that helps you fall asleep at night.

2. HYDRATION
   i. Drink 2 glasses water as soon as you wake up – flush out all the toxins from your overnight cellular detox – give your body a wash from the inside.
   ii. Always have a water bottle with you – Make sure it is a good quality bottle (not plastic if possible).
   iii. Drink about half your body weight in water e.g. if you weigh 60kg, drink 3 litres of water (3,000mils).

3. SUNSHINE AND FRESH AIR
   i. Get 5 mins morning sunlight on your face – have your morning wake up water/coffee sitting in the backyard on the balcony – in the sun.
   ii. Get outdoors in the sun, go for walks, do gardening, go to the beach and take in the fresh air.

4. EXERCISE AND MOVEMENT
   i. Do at least 20–30 mins of planned movement each day (this can be a fitness class, a gym session, yoga, or even a simple walk).
   ii. Get an exercise buddy and set a goal of exercising together.
   iii. Take exercise snacks throughout the day. E.g. do 5 minutes of exercises like Air squats, High Knees, Star jumps, Push-ups, Lunge walking, Yoga, Dancing etc.
   iv. Build strong muscles – do strength training You can also download a program from the internet – there are many free programs available on YouTube.
   v. Build a strong heart – at least once a week – move so that you are breathing heavy – walk up some stairs or a hill, do some sprints/running, do a dance or HIIT class.
   vi. Find an activity that you love e.g. tennis, fitness class, swimming, hiking, golf, paddle boarding, dancing.

7. SOCIAL CONNECTION
   i. Stay in contact on a regular basis through phone, Zoom, Skype and where possible picnics and events.
   ii. Even in your own home, make time to play games with the family (games that are of interest to the children of course).
   iii. Dinner meals together, device free and have a talanoa session.

6. STRESS MANAGEMENT
   i. Daily meditation, yoga, massage, journaling, pray and worship, and quality time with loved ones
   ii. For instant relief from a stressful moment - drink a glass of water or do 5 mins of movement or do deep breathing exercise (breath in for 5 sec, hold for 5 sec, breathe out for 5 sec, hold for 5 sec and repeat 5 times)
   iii. Our thoughts create our body, every thought affirms or detracts from who we are, learn to self-manage your thoughts and have an affirmation practice.
   iv. Limit exposure to general news sources TV/radio and social media
   v. Follow the health tips in this section

5. HEALTHY EATING
   i. Good portions and healthy proteins (beef, fish, pork, chicken, lamb, shellfish, eggs, cheese) and fats (avocado, olive oil, nuts with loads of fresh vegetables and fruit.
   ii. Avoid sugar and sweetened processed foods like donuts, cakes, cookies, ice-cream, coke, sprite etc.
   iii. Improve gut and cellular health, try fasting. Twice week, fast for 12 hours between your last meal to the next meal. An easy way – eat your last meal at by 7pm, and do not eat again until after 7am the next day.
HEALTHY MIND, HEALTHY HEART

Relationships
Laughter and joy with family and friends

Connecting
With local community groups, religious bodies, support groups

Time
Make regular time for social connections

Be Positive
Be Positive, look for the goodness in all

Self-care
Tik Tok, Selfie or just take time out for self-care. It is fuel for self!

Work
Work that you find enjoyable

Compassion
Be compassionate to yourself!

Hobbies
Find new hobbies and interests

Forgive
Learn self forgiveness – no one is perfect

Sleep
Good sleeps, at least 7–9 hours

Device free
Enable device free time

Be You
Involve in activities and local organisations you like

Reach out
It is OK to reach out to someone or anonymous helplines (see Help)

Nutrition
Eat wholesome, nutritious foods

Activities
Organise family fun picnics

Exercise
Do regular physical activity

Engage and Empower
PROMOTING YOUR MENTAL FITNESS

## Lagi’s 14 Day Home Fun Activities

<table>
<thead>
<tr>
<th>Activity</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Tiki Tiki Movie Challenge</strong></td>
<td>Adults versus children. Create a 10-minute Tiki Tiki movie either dance or song. Showcase after dinner. Winner gets the Tik Tik Oscar award.</td>
</tr>
<tr>
<td><strong>Hug in a Mug</strong></td>
<td>Give yourself a hug in a mug. Decorate the mug and add all the things that make you happy.</td>
</tr>
<tr>
<td><strong>TV Explorer Documentary</strong></td>
<td>Explore either the garden, outdoor area or inside your home. Draw 10 living things that make you happy. Do a TV presentation, make sure you have your props!</td>
</tr>
<tr>
<td><strong>Mindful Rainbow Walk</strong></td>
<td>Walk around your home or in the garden and try looking through the windows or outside, what do you see?</td>
</tr>
<tr>
<td><strong>Read I am Lupe or Choose a favourite book</strong></td>
<td>Read Then create your own story book. You can use anything be creative!</td>
</tr>
<tr>
<td><strong>Legends &amp; Myths</strong></td>
<td>Coco Kids segment to learn &amp; enjoy. Animated Legends, Coco Kids Cooking, Language Learning games and more!</td>
</tr>
<tr>
<td><strong>10 faces</strong></td>
<td>Draw 10 faces and fill in the faces with the different types of emotions, start with happy and love.</td>
</tr>
<tr>
<td><strong>Time travel</strong></td>
<td>Travel back to try a traditional Game taulafaga (Samoa), Tsigoga-Storytelling of Myths and Legends (Samoa), Hiko and Heu (Tongan), Hand game (Maori), Pani (Fiji-Indian) (See Pacific Resources for links)</td>
</tr>
<tr>
<td><strong>Dress Ups</strong></td>
<td>Get a whole heap of adult funky clothes. Now create your own styles and prepare for your own little family runway. Great for an after-dinner family activity.</td>
</tr>
<tr>
<td><strong>Photobooth</strong></td>
<td>Set up a GIF/Photo booth. Grab some costumes, make-up, props, and get ready to have a blast. Feel like your photobooth needs more? Create your own props!</td>
</tr>
<tr>
<td><strong>Family Fun Dance-off</strong></td>
<td>Help your kids choose a song, create a dance to go along with it. Then, dance it out! Alternatively, you can use our Lollipop Emoji characters (if you have some Lollipops) and hide them!</td>
</tr>
<tr>
<td><strong>Indoor treasure hunt</strong></td>
<td>Use anything you have laying around to act as treasure. Alternatively, you can use our Lollipop Emoji characters (if you have some Lollipops) and hide them!</td>
</tr>
<tr>
<td><strong>Kids Activity Stations</strong></td>
<td>Let the children choose! Set up 6 stations around the house with a different activity at each station. Then, see how many circuits you and your kids can do in 10 minutes. Here are some activity station ideas: Jumping jacks, Squats, Pushups, Planks, Hula hoop, Hop on one leg, Frog jumps.</td>
</tr>
</tbody>
</table>

---

**Note:** These activities are designed to promote well-being and fun during home isolation. Please adapt them based on your family’s preferences and needs.
FAQ

- **What is COVID-19?** A disease caused by a virus called SARS-CoV-2. Although most people get better within weeks of illness, some people experience post-COVID conditions. Post-COVID conditions are a wide range of new, returning, or ongoing health problems people can experience more than four weeks after first infection. Vaccines against COVID-19 are safe and effective.

- **How is COVID-19 Spread?** 3 Main ways Breathing in air when close to an infected person. Having small droplets and particles that contain virus land on the eyes, nose, or mouth, especially through splashes and sprays like a cough or sneeze. Touching eyes, nose, or mouth with hands that have the virus on them.

- **Are children at risk?** Children can get sick with COVID-19. Most children with COVID-19 have mild symptoms or they may have no symptoms at all (“asymptomatic”). Fewer children have been sick with COVID-19 compared to adults.

- **When can I be vaccinated after being COVID-19 Positive?** Vaccination can be deferred for up to 6 months as past infection reduces the chance of reinfection for at least this amount of time. However, there is no requirement to delay vaccination. You can choose to be vaccinated if significantly immunocompromised, it’s an employment requirement, and when you have recovered from the acute illness. People with prolonged symptoms from COVID-19 beyond 6 months should be vaccinated on a case-by-case basis. Talk to your Doctor.

- **Can ALCOHOL prevent COVID-19?** No, drinking alcohol does not protect you from COVID-19 infection

- **Can WATER drinking prevent COVID-19?** While staying hydrated by drinking water is important for overall health, it does not prevent coronavirus infection.

- **Does religion permit the use of hand sanitizers?** Manufactured substance to alleviate illness is permitted by the Qur’an, including alcohol used as a medical agent.

- **Do vitamin and mineral supplements cure COVID-19?** No, Micronutrients, such as vitamins D and C and zinc, are critical for a well-functioning immune system, it is NOT a treatment of COVID-19.

- **Can we wear MASKS when exercising?** People should NOT wear masks when exercising, as masks may reduce the ability to breathe comfortably. As well, NO, when properly worn, it does not cause CO2 intoxication.

- **Is there a Cure for COVID-19?** NO, there is none YET

- **Do Methanol, ethanol or bleach cure COVID-19?** NO, it’s poison. Drinking them can lead to disability and death.

- **Why do experts give different advice?** Risks can change, and it also is the best evidence available at the time.

- **What is it like to get tested for COVID-19?** The person will use a cotton bud to take a swab from your nose and throat, it is slightly uncomfortable, the person will tell you what you must do next after asking you a few questions on where you have been and what symptoms you have. You can ask for your results to be sent to an alternative address.

- **Why is a booster needed?** Studies show that the immunity created by COVID-19 vaccines begins to wane over time. A booster shot strengthens your immune system and helps to maintain a high level of protection against serious illness from the COVID-19 virus.

- **Who is eligible for a booster shot?** Eligibility for booster vaccination includes people aged 18 years and over who received their second dose of a COVID-19 vaccine 6 months or more ago. People who are immunocompromised and have received a third primary dose of a COVID-19 vaccine are not yet recommended to have a booster (fourth) dose.

- **Why are people aged 12 – 17 not eligible for a booster when they can get a vaccine?** Booster doses are not currently recommended for those aged under 18 years. In this age group, severe COVID-19 is uncommon, and the primary course of COVID-19 vaccines generates a strong immune response, so the benefit from additional doses of vaccine is likely to be small. In addition, there are currently only very limited data on the safety of repeated mRNA vaccine doses in this age group.

Self-isolation is a vital way to stop the spread of COVID-19. People who test positive to COVID-19 on a rapid antigen test or PCR test and their household contacts must self-isolate for 7 days.

This guideline helps explain the current Public Health (COVID-19 Self-isolation) Order (https://www.health.nsw.gov.au/Infectious/covid-19/Pages/public-health-orders.aspx#isolation) and should be read in conjunction with the fact sheets:

What is self-isolation? Self-isolation is when you stay in your home or accommodation away from other people. Self-isolation means:

- not going to work or school
- not going to any public places (for example shops, parks, beaches)
- not using public transport
- not having any visitors in your home, unless they are providing healthcare, emergency maintenance or emergency services

You are only allowed to leave self-isolation to:

- get a COVID-19 test, seek urgent medical care, avoid an emergency

How do I self-isolate from my household? If you live with other people, you should stay separated from them during your self-isolation period.

Physically distance:

- stay and sleep in a separate room
- use a separate bathroom if available, or clean a shared bathroom after use
- do not be in the same room as another person (even if they are also in isolation)
- not using public transport
- do not share household items including dishes, cups, bedding. After using, wash them thoroughly with soap

Practice good hygiene:

- Wash your hands with soap and water for at least 20 seconds or use an alcohol-based hand sanitizer before entering an area where other people may go, before touching things used by other people, after using the bathroom, after coughing or sneezing, before putting on and after removing face masks, before eating or drinking
- Cover coughs and sneezes
- Regularly clean surfaces (such as tabletops, doorknobs and bathroom fixtures) with household disinfectant.
- Wear a mask in shared areas or when caring for other members of your household
- Take extra care to remain separate from any members of your household who are elderly, immunocompromised or have medical conditions

What if I need to travel home? Travel in a private vehicle, cycle or walk, or use a taxi or ride share service. Do not use public transport or fly. You should wear a face mask and stay 1.5 metres away from other people.

When travelling by vehicle with others, sit in the back seat with the windows open, all wear a face mask that covers your nose and mouth at all times, sanitize your hands before you get into the vehicle.

What if I have shared care arrangements? Moving between households, even for shared caring arrangements, is not recommended.

What support is available while I am in self-isolation? If you have questions about self-isolation contact NSW Health Isolation Support Line on 1800 943 553 or call Service NSW on 13 77 88.

Food and other essential supplies

If you need food or other essential supplies (such as medication) during self-isolation:

- Ask family or friends to pick up supplies as needed and leave them at your door
- Order supplies online
- If you have no other way of obtaining food or other essentials call the NSW Health Isolation Support Line on 1800 943 553

Help in your language: For free help in your language, call the Interpreter Service on 13 14 50.
Information for People Exposed to COVID-19

How will I know if I have been exposed to COVID-19?

- NSW Health is focusing on contacting people at highest risk of catching/contracting COVID-19. You may not receive a text message or call from NSW Health after being exposed to a person with COVID-19.
- We ask people with COVID-19 to tell the people they have spent time with from the 2 days before they started having symptoms or 2 days before they tested positive (whichever came first) that they have COVID-19.
- If you are told by someone that you have been in contact with a person with COVID-19, get tested and isolate.

Who is at risk of getting infected?

The risk of infection with COVID-19 increases:

- with the amount of time, you spend with someone who has COVID-19 and how closely you interacted with them.
- when you are indoors (the risk is lower if you are outdoors).
- when you do not wear a mask (the risk is much lower if the person you are with also wears a mask).

Vaccination decreases the risk of getting COVID-19, but this protection reduces over time and can be less effective against certain variants of COVID-19, such as Omicron. Booster doses significantly helps to increase this protection, including for the Omicron variant. Vaccination is also important in protecting against severe disease. Everyone should get their booster as soon as they are eligible.

To book your COVID-19 vaccination please visit the COVID-19 Vaccine Clinic Finder: 

How long am I at risk for? After being exposed to someone with COVID-19 you are at risk of getting it for 14 days.

What should I do if I have been exposed to someone who has COVID-19?

<table>

For more information, see: 
**Financial Support**

**PAYMENT**
You may get a payment from Centrelink if you or your family are affected by coronavirus (COVID-19). Visit or call a service centre.
If you need ongoing financial help, you may be able to get a payment such as:
- JobSeeker Payment
- Youth Allowance
- Parenting Payment
- If you're eligible for a payment from us and are in severe financial hardship

**Gather Documents**
- Prove your identity documents
- Report your income
Some payments have income reporting requirements.

**State or territory pandemic payment**
There may be a state or territory pandemic payment available if you've been affected by coronavirus (COVID-19).
- Claim a payment
Complete the steps to claim a payment due to coronavirus – see the following link for further assistance:

**LEGAL AND TENANCY SUPPORT**
- Community Legal Centres NSW offers free legal assistance
- LawAccess NSW on 1300 888 529 for a free telephone service, with legal information, referrals
- Tenants' Advice and Advocacy Services for free advice and advocacy for tenants in NSW
- Aboriginal Tenants Advice and Advocacy Service for information, advice, advocacy and representation services for Aboriginal tenants in NSW
- NSW Civil and Administrative Tribunal for resolving tenancy disputes
- NSW Fair Trading to make a residential tenancy complaint

**FINANCIAL COUNSELLING SERVICES**
- Provides free financial counselling by accredited counsellors
- See Resources for List of Financial Counselling services across NSW

**TEMPORARY VISA HOLDERS**
COVID-19 Emergency Relief Grant for Vulnerable Temporary Visa Holders providing support to those experiencing hardship due to COVID-19 – see Resources for Current List.
For asylum seekers (residing in NSW) in crisis during COVID-19 who do not receive assistance from the Commonwealth government, please contact one of the below organisations:
- Asylum Seeker Centre – within Greater Sydney Metro
- Jesuit Refugee Services – within Greater Sydney Metro
- House of Welcome – within Greater Sydney Metro
- Settlement Services International – within Greater Sydney Metro
- The Salvation Army – focusing on regional NSW areas (including Cooma, Narrabri and Newcastle)
- Australian Red Cross Society – focusing on regional NSW areas (Griffith, Leeton, Wagga Wagga, Albury, Deniliquin and Tumut)

</table>
Box 1: People with the following immunocompromising conditions and therapies for which a 3rd primary dose is recommended

- **TALK TO YOUR DOCTOR**
- Active haematological malignancy
- Non–haematological malignancy with current active treatment including chemotherapy, radiotherapy, and/or hormonal therapy, but excluding immunotherapy with immune checkpoint inhibitors
- Solid organ transplant with immunosuppressive therapy
- Haematopoietic stem cell transplant (HSCT) recipients or chimeric antigen receptor T-cell (CAR-T) therapy within 2 years of transplantation
  - These patients require **re Vaccination with 3 additional doses** of COVID-19 vaccine, irrespective of doses given prior to transplantation, commencing generally ≥3–6 months after their transplant after discussion with their treating specialist
  - Those beyond 2 years from transplant should discuss with their treating specialist about the need for a 3rd dose
- Immunosuppressive therapies including:
  - High dose corticosteroid treatment equivalent to >20mg/day of prednisone for ≥14 days in a month, or pulse corticosteroid therapy
  - Multiple immunosuppressants where the cumulative effect is considered to be severely immunosuppressive
  - Selected conventional synthetic disease-modifying anti-rheumatic drugs (csDMARDS):
    - including mycophenolate, methotrexate (>0.4 mg/kg/week), leflunomide, azathioprine (>3mg/kg/day), 6-mercaptopurine (>1.5 mg/kg/day), alkylating agents (e.g. cyclophosphamide), and systemic calcineurin inhibitors (e.g. cyclosporin, tacrolimus)
    - excluding hydroxychloroquine or sulfasalazine when used as monotherapy
  - Biologic and targeted therapies anticipated to reduce the immune response to COVID-19 vaccine:
    - Including B cell depleting agents (e.g. anti-CD20 monoclonal antibodies, BTK inhibitors, fingolimod), anti-CD52 monoclonal antibodies (alemtuzumab), anti-complement antibodies (e.g. eculizumab), anti-thymocyte globulin (ATG) and abatacept
    - excluding agents with likely minimal effect on vaccine response such as immune checkpoint inhibitors, anti-integrins, anti-TNF-α, anti-IL1, anti-IL6, anti-IL17, anti-IL4 and anti-IL23 antibodies
- Primary immunodeficiency including combined immunodeficiency and syndromes, major antibody deficiency (e.g., CVID or agammaglobulinemia), defects of innate immunity (including phagocytic cells), defects of immune regulation, complement deficiencies and phenocopies of primary immunodeficiencies.
- Advanced or untreated HIV with CD4 counts <250/μL or those with a higher CD4 count unable to be established on effective antiretroviral therapy
  - a 3rd primary dose isn’t required for those living with HIV, receiving ART with CD4 counts >250/μL Long term haemodialysis or peritoneal dialysis
