Step 1: How to video your audition

Smartphone or Tablet Recording
When using your smartphone to record yourself perform, try to ensure that –

- Each work is recorded in one continuous take for the duration of the video (except brass – see below)
- The room you record in is well lit and quiet. Avoid really bright side light or back light. The best location to film is usually with you facing a window
- Make sure the background of the room in which you film is not distracting
- Your device is placed on a tripod or makeshift stand, i.e. not handheld
- Flight mode is turned on and Wireless is turned off so you receive no calls or messages during the recording
- While you can use specialise recording software such as Adobe’s Premiere Rush to record yourself, the standard Camera applications on iOS and Android devices are usually sufficient to obtain good quality results
- If you are using an iPhone make sure your camera is set to record at 720p HD at 30fps. This is set in the Camera Settings within the Settings application. Recording at higher quality settings is not necessary for evaluation and will significantly impact the upload time of your final recording
- If you are using an Android device make sure your camera is set to record at 720p HD at 30fps or the next lowest possible video resolution. Recording at higher quality settings is not necessary for evaluation and will significantly impact the upload time of your final recording.

At the beginning of each video submitted, please announce the following details:
- Your full name and instrument you are auditioning in
- The work you will be performing

Editing Software
If you wish to edit extraneous material from the start or end of your recording we recommend the following free mobile device applications –

- iMovie (iOS) - [https://www.apple.com/imovie](https://www.apple.com/imovie)

Please note that you will not be penalized for choosing not to edit your recording.
Do not edit or enhance the sound of your playing with software plug-ins.

Laptop/Desktop Recordings
Using an external webcam and a USB microphone, you will be able to capture a higher quality video recording. Make sure you observe all the recommendations with respect to filming outlined above. We recommend using the following software to capture, edit, and export your performance –

- Filmora9 (Mac OS, Windows) - [https://filmora.wondershare.com/video-editor/](https://filmora.wondershare.com/video-editor/)

Whichever software you use, please do not export final recordings above 720p 30FPS.

Uploading to YouTube or Vimeo
Uploading videos to YouTube or Vimeo is a very straightforward process. For a step-by-step guide, please refer to –

- YouTube: [https://support.google.com/youtube/answer/57407?hl=en](https://support.google.com/youtube/answer/57407?hl=en)

If you choose to upload to YouTube, make sure your video is unlisted so it does not appear on a public search. On Vimeo, you should make your video available to only people with a password. This is set on the Privacy Settings on your video page. Please don’t forget to include the password with your submission.
