How to video your audition

Smartphone or Tablet Recording
When using your smartphone to record yourself perform, try to ensure that –

- Each work is recorded in one continuous take for the duration of the video (except brass, see page 11)
- The room you record in is well lit and quiet. Avoid bright side light or back light. The best location to film is usually with you facing a window
- Make sure the background of the room in which you film is not distracting
- Your device is placed on a tripod or makeshift stand, i.e. not handheld
- Flight mode is turned on and Wireless is turned off, so you receive no calls or messages during the recording
- While you can use specialise recording software such as Adobe’s Premiere Rush to record yourself, the standard Camera applications on iOS and Android devices are usually sufficient to obtain good quality results
- If you are using an iPhone, make sure your camera is set to record at 720p HD at 30fps. This is set in the Camera Settings within the Settings application. Recording at higher quality settings is not necessary for evaluation and will significantly impact the upload time of your final recording
- If you are using an Android device, make sure your camera is set to record at 720p HD at 30fps or the next lowest possible video resolution. Recording at higher quality settings is not necessary for evaluation and will significantly impact the upload time of your final recording.
