

The future of weed control in Australian cropping systems

Michael Walsh
Director Weed Research

THE UNIVERSITY OF
SYDNEY

Site-specific weed management

Control of individual weeds or weed patches

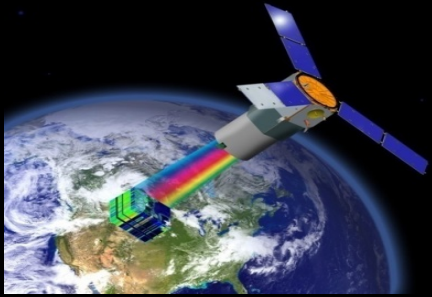

Potential for 60-90% savings in weed control costs

Introduce new weed control technologies

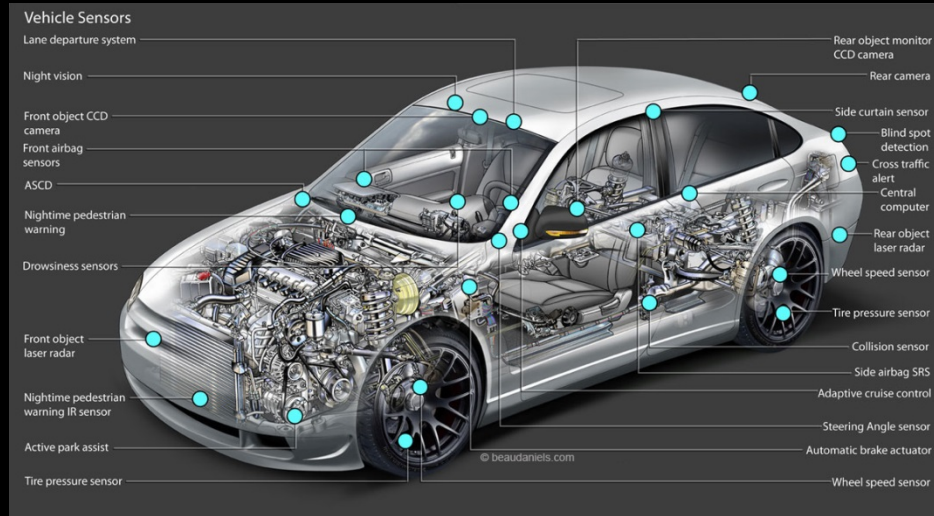

Site-specific weed management

Requires weed identification and mapping

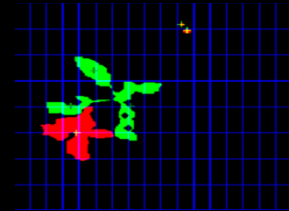

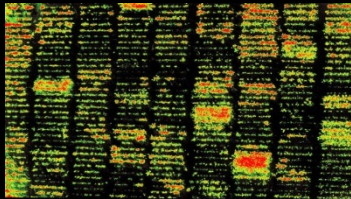

Camera and sensor technologies

Site-specific weed management

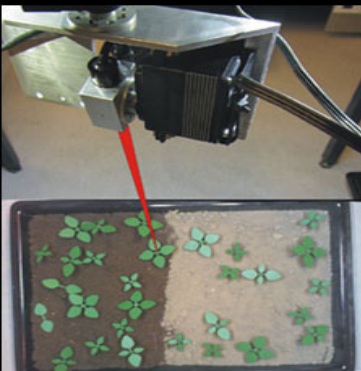

Site-specific weed management

Alternate weed control treatment

Laser weeding

Stamping

Microwaves

Electrical weeding

Solar irradiation

Thank you
