In the past week, samples of wheat stripe rust have been received by the Australian Rust Survey at the Plant Breeding Institute from southern Queensland and southern New South Wales. This report also provides information on the currently known distributions of wheat leaf rust and oat stem and crown rusts. Wheat leaf rust has been reported from all wheat-producing states. Details of leaf, crown and stem rust pathotypes will be distributed in the next 7-10 days once the first results are finalised.

# First samples of wheat stripe rust from Queensland and southern New South Wales

The first samples of wheat stripe rust were received on the 7<sup>th</sup> August from Goondiwindi and Westmar in Queensland. Samples were taken off the varieties Sunbri and Baxter. A sample was received on the 11<sup>th</sup> August from Wagga Wagga in southern New South Wales. Growers in New South Wales and Queensland are advised to inspect their crop for wheat stripe rust.

## Wheat leaf rust reported in all wheat-producing states.

Western Australian samples of wheat leaf rust were received off Yitpi from Lake Grace on the 2<sup>nd</sup> July and off Mace from Ravensthorpe on the 31<sup>st</sup> July. Victorian samples were received off Revenue from Inverleigh on the 2<sup>nd</sup> July and Derrinallum on the 9<sup>th</sup> July. A sample off Manning was received from Bool Lagoon in South Australia on the 22<sup>nd</sup> July. A sample off Revenue was received from Dunedoo in New South Wales on the 30<sup>th</sup> July and a sample off wheat from Jericho in Tasmania was received on the 10<sup>th</sup> August.

### Oat stem and crown rust

Oat stem rust samples were received in early June from Wellcamp and Wyaga in Queensland. Another sample from Queensland off wild oat from Kingsthorpe was received on the 1<sup>st</sup> July. A Victorian sample off oat from Stawell was received in early June.

Oat crown rust samples have only been received from Queensland. The first samples arrived in late May and early June from Mount Tabor and Wellcamp. Since then, samples have been received off Warialda from Harlaxton on the 23<sup>rd</sup> July and off Drover from Freestone on the 27<sup>th</sup> July.

### Reply Paid envelopes now available for free

To make it easier to submit samples to the Australian Rust Survey, reply paid envelopes are now available. If you would like to receive a supply of free envelopes, please contact Will Cuddy. Alternatively, the reply paid details at the bottom of this report can be used on any envelope to post a sample to the survey.
