Honours is a prestigious year of undergraduate study, which will provide you with the opportunity to challenge and extend on the knowledge developed in your bachelor's degree. Honours provides you with the opportunity to develop research skills, to undertake independent research and to complete a project leading to a thesis.

Overview

The **Bachelor of Science (Honours) (Animal and Veterinary Bioscience)** is an additional, appended degree and year of intensive study that high achieving students may apply for and study after completion of a relevant bachelor's degree.

The Bachelor of Science (Honours) (Animal and Veterinary Bioscience) extends your prior studies, deepening your expertise in the field and opening the door to further research, such as a master's by research or a PhD. If further research isn't the aim, the Bachelor of Science (Honours) (Animal and Veterinary Bioscience) will develop transferrable skills to complement your bachelor's degree, such as critical thinking

and communication skills, and project management and delivery.

Honours is the next step if you're seeking a competitive edge in your career. Under the guidance and mentorship of an academic supervisor, you'll select a thesis topic and identify your method of research. This prepares you to write your thesis so that it makes an argument based on rigorous study and empirical assessment. Academic supervisors are looking for high-performing students who can work independently.

What you'll study

If you choose to pursue the Bachelor of Science (Honours) (Animal and Veterinary Bioscience) you will undertake:

- Honours units of study (4000-level or above)
- A supervised but independent honours research project

Understanding your fees

For more information on fees, please visit [sydney.edu.au/students/understanding-fees/commonwealth-supported-places](https://www.sydney.edu.au/students/understanding-fees/commonwealth-supported-places)

Indicative entry requirement

- Achievement of a minimum Weighted Average Mark (WAM) of at least 65.00 or have a credit average (65.00) in 48 credit points of relevant 2000-level and 3000-level units of study
- Completion of 144 credit points in a Bachelor of Science and Bachelor of Advanced Studies (Animal and Veterinary Bioscience) degree including the Animal and Veterinary Bioscience major
- Satisfy any additional criteria set by the Faculty of Science

Admission is competitive and meeting the above is not a guarantee of entry.
