Welcome

On behalf of Sydney Law School, the Charles Perkins Centre and The George Institute for Global Health, we would like to warmly welcome you to the 2019 Food Governance Conference.

The Camperdown Campus of the University of Sydney is situated on the ancestral lands of the Gadigal people of the Eora Nation, and we would like to acknowledge and pay our respects to the traditional owners of the land on which this Conference is being held. We hope that those of you who are visiting will enjoy exploring the University's campus and its historic buildings. The Campus is also located close to the CBD, which offers the opportunity to discover Sydney's many wonderful attractions.

The Food Governance Conference is a collaborative endeavour between Sydney Law School and the Charles Perkins Centre, the University's dedicated institute for easing the global burden of obesity, diabetes, cardiovascular disease and related conditions. First held in 2016, the Conference explores the role of law, regulation and policy in addressing food system challenges such as food security, safety, and sustainability, equity and social justice in global food systems, malnutrition in all its forms, and diet-related disease.

The 2019 Conference has a strong focus on the role of human rights in addressing food system issues, managing conflicts of interest in food and nutrition research and policy, and sharing law- and policy-making experiences from different countries around the world.

The Conference takes a broad, interdisciplinary approach, with the goal of highlighting the interrelationships between the main challenges facing the global food system in the 21st century, and to create new opportunities for collaboration between

researchers, policymakers, and practitioners working in all aspects of food governance.

In addition to the contributions of the Law School and the Charles Perkins Centre, we are grateful for the sponsorship provided by The George Institute for Global Health, and by the Sydney Food and Nutrition Network, as well as for the support provided by the McCabe Centre for Law and Cancer.

We trust that you will enjoy the diverse and innovative Conference program and thank you for joining us at the 2019 Food Governance Conference at the University of Sydney.

Dr Belinda Reeve,

The University of Sydney Law School

As one of the best law schools in the world for teaching and research, students at The University of Sydney Law School learn from globally recognised legal educators and highly respected professional practitioners. Within the Law School, Sydney Health Law is the focal point for health law research, teaching and community engagement, building on two decades of excellence in teaching and research across all areas of health law.

Charles Perkins Centre

The Charles Perkins Centre is the University's dedicated institute for easing the global burden of obesity, diabetes, cardiovascular disease and related conditions. The Centre pursues research that is mindful of the interconnected effect of the environment, food, genetics, and technology – among other factors – in determining individual and wider population health. Within the Charles Perkins Centre, the Food Governance Node acts as a platform for interdisciplinary research on how governments can use law, policy, and regulation to create the conditions for people to live healthier lives.

Sydney Food and Nutrition Network

The George Institute for Global Health

The George Institute for Global Health is an independent health and medical research institute headquartered in Sydney with major centres in China, India and the United Kingdom. The Institute's food policy team work in Australia and overseas to reduce death and disease caused by diets high in salt, harmful fats, added sugars and excess energy. In 2013, The Institute was designated a World Health Organization Collaborating Centre on Population Salt Reduction. Our flagship FoodSwitch program, a database of nutrition and labelling information for over 500,000 packaged and restaurant foods, enables us to analyse changes in the healthiness of the food supply provided to more than a billion people worldwide. The FoodSwitch app (now available in eight countries) uses our data to guide consumers toward healthier choices in store.

Sydney Food and Nutrition Network

Professor Hilal Elver's travel to Australia was co-sponsored by the Sydney Food and Nutrition Network at the University of Sydney. The Network provides a unified identity through which food and nutrition researchers and educators at the University of Sydney can develop and pool their skills to produce high-profile interdisciplinary research with immediate or long-term effectiveness for solving real-world problems. If you are a researcher or student at the University of Sydney and interested in joining this Network, please visit their website.

Keynote speakers

Professor Hilal Elver

Professor Hilal Elver has been the United Nations Special Rapporteur on the Right to Food since June 2014. She is an international law professor and Global Distinguished Fellow at the UCLA Law School Resnick Food Law and Policy Centre, as well as the Co-Director of the Climate Change, Human Security and Democracy project at the Orfalea Centre, UC Santa Barbara. She has also served the Turkish Government as the founding legal advisor of the Ministry of Environment, and as General Director of the Women Status at the office of the Prime Minister. Until 2014 she was one of the members of the Turkish delegation at the UN Climate Change Convention (UNFCCC). She has published three books – *Peaceful Uses of International Rivers: The Euphrates and Tigris Basin* (2002); *Headscarf Controversy: Secularism and Freedom of Religion* (2012) and *Reimagining Climate Change* (2016).

Ms Ronni Kahn

Driven by a determination to find purpose in her life, the simple act of rescuing good food and delivering it to people in need quickly caught on, and in 2004 OzHarvest was born. Ronni Kahn is renowned for her boundless energy, infectious enthusiasm and not taking no for an answer! Her ability to inspire and motivate everyone she meets has seen OzHarvest grow from humble beginnings to become Australia's leading food rescue organisation. Her journey in the fight against food waste became the feature of an independent film *Food Fighter* and in 2019 she was appointed Officer of the Order of Australia. Other awards recognizing her achievements include: Boss Magazine Top 21 True Leaders (2017); Gourmet Traveller's Outstanding Contribution to Hospitality (2017); Griffith University's Doctor of the University (honoris causa); and Australian Local Hero of the Year (2010).

Ms Mellissa Wood

Mellissa Wood, GAICD, is ACIAR's General Manager, Global Programs where she leads ACIAR's engagement with global and multilateral fora, such as the G20 and the United Nations Food and Agriculture Organisation and leads the formulation and implementation of Australia's international stakeholder engagement strategies with the CGIAR and other international Agricultural Research Centres (IARCS). She returned to Australia and joined ACIAR as the Director of the new Australian International Food Security Centre (AIFSC) during 2012-2015. She has a strong research interest in improving the adoption of research outputs for food and nutrition security outcomes, with a focus on partnering with policy makers and the private sector to facilitate this.

Professor Sharon Friel

Sharon Friel is Professor of Health Equity and Director of the School of Regulation and Global Governance (RegNet), Australian National University. She is also Director of the Menzies Centre for Governance, Policy and Health Equity ANU. She is a Fellow of the Academy of Social Sciences Australia and co-Director of the NHMRC Centre for Research Excellence in the Social Determinants of Health Equity. Between 2005 and 2008 she was the Head of the Scientific Secretariat (University College London) of the World Health Organisation Commission on Social Determinants of Health. Her interests are in the political economy of health; policy, governance and regulation in relation to the social determinants of health inequities, including trade and investment, food systems, urbanisation and climate change. Her recent book "*Climate Change and the People's Health*" was published by OUP in Jan 2019.

Dr Juan A. Rivera

Juan A. Rivera PhD is General Director of the National Institute of Public Health (INSP) in Mexico and Professor of Nutrition at the Mexican School of Public Health. He is Executive Board member of the International Association of National Public Health Institutes (IANPHI), and his other memberships include The EAT Lancet Commission, the National Academy of Medicine of Mexico, the American Society for Nutrition, the Board Directors' Member of the Pact for Early Childhood, the World Obesity/Public Prevention Steering Committee, and the High-Level Panel of Experts on Food Security and Nutrition (HLPE). He was President of the Latin American Society of Nutrition (SLAN) and founding director of the Centre for Nutrition and Health Research at INSP. At present, he has more than 490 scientific publications and his work has been quoted more than 19,100 times in scientific journals around the world.

Ms Nicole Turner

Nicole Turner is a Kamilaroi woman who currently lives on the New South Wales coast. She is one of very few qualified Aboriginal community nutritionists in Australia. Nicole is chairperson of Indigenous Allied Health Australia (IAHA) and is also an adjunct Professor of Nutrition and Dietetics at University of Canberra. Nicole has published numerous papers in international journals and presented at several conferences around Australia and overseas on a variety of topics, especially Indigenous health. Nicole's passion is nutrition and living a healthy lifestyle. She believes we need to give knowledge to our people about the importance of maintaining a healthy lifestyle and preventing chronic diseases. She is involved with many national, state and local committees and organisations.

Master of Health Law and Graduate Diploma in Health Law

Sydney Law School offers one of the nation's leading postgraduate programs in health and medical law.

The Master of Health Law (MHL) prepares graduates for professional work in the fields of health practice, governance and management by equipping them with skills and knowledge to negotiate the legal, ethical and policy issues affecting healthcare and the provision of health services.

The core curriculum covers legal issues arising from the provision of health care services, the impact of new technologies on health care, the regulation of the health professions, and public health. The elective curriculum currently explores the fields of public health law; mental health law; legal issues affecting reproduction, death, and genetics; dispute resolution, mediation, and class actions; global governance and policy; and health, development, trade and investment.

The MHL combines the experience and expertise of teachers and students from the legal and health professions. This allows the study of health law issues to be considered in an interdisciplinary context with knowledge of health structures and medical procedures integrated with knowledge of legal structures and principles.

The core and elective units of study will develop students' ability to identify, analyse and solve complex legal, ethical and policy issues affecting health and the provision of health services.

The Graduate Diploma in Health Law (GradDipHL) is designed for students who have an interest in health law, but do not wish to complete the full Master's program. The Graduate Diploma consists of two core units, and two optional units. (N.B. The Graduate Diploma in Health Law is not open to International Students.)

FoodSwitch: State of the Food Supply

A recent study led by The George Institute for Global Health analysed more than 32,000 processed food items on sale across Australia as part of an annual snapshot.

The new report, which ranks the healthiness of Australia's leading food and drinks manufacturers, found that between 2017 and 2018:

The average Health Star Rating of product portfolios for the 33 largest manufacturers fell in 16 cases and rose for only 8 and;

There was no substantive improvement in the nutritional quality of any major food category.

That's food for thought...
